Write the model and serial numbers here:

Model # __________________
Serial # __________________

You can find them on a label inside the oven.
IMPORTANT SAFETY INSTRUCTIONS.
READ ALL INSTRUCTIONS BEFORE USING.

⚠️ WARNING!
For your safety, the information in this manual must be followed to minimize the risk of fire or explosion, electric shock, or to prevent property damage, personal injury, or loss of life.

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

(a) Do Not Attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
(b) Do Not Place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
(c) Do Not Operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
   (1) door (bent),
   (2) hinges and latches (broken or loosened),
   (3) door seals and sealing surfaces.
(d) The Oven Should Not be adjusted or repaired by anyone except properly qualified service personnel.

IMPORTANT SAFETY INSTRUCTIONS.
When using electrical appliances basic safety precautions should be followed, including the following:

- Read and follow the specific precautions in the Precautions to Avoid Possible Exposure to Excessive Microwave Energy section above.
- This appliance must be grounded. Connect only to a properly grounded outlet. See the Grounding Instructions section on page 4.
- Install or locate this appliance only in accordance with the provided installation instructions.
- Be certain to place the front surface of the door three inches or more back from the countertop edge to avoid accidental tipping of the appliance in normal usage.
- Do not mount this appliance over a sink.
- Do not mount the microwave oven over or near any portion of a heating or cooking appliance.
- Do not store anything directly on top of the microwave oven surface when the microwave oven is in operation.
- Do not operate this appliance if it has a damaged power cord or plug, if it is not working properly, or if it has been damaged or dropped. If the power cord is damaged, it must be replaced by General Electric Service or an authorized service agent using a power cord available from General Electric.
- Do not cover or block any openings on the appliance.
- Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This microwave oven is specifically designed to heat, dry or cook food, and is not intended for laboratory or industrial use.
IMPORTANT SAFETY INSTRUCTIONS.

Use this appliance only for its intended purpose as described in this Owner’s Manual.

- This microwave oven is not approved or tested for marine use.
- Do not store this appliance outdoors. Do not use this product near water—for example, in a wet basement, near a swimming pool, near a sink or in similar locations.
- Keep power cord away from heated surfaces.
- Do not immerse power cord or plug in water.
- Do not let power cord hang over edge of table or counter.
- To reduce the risk of fire in the oven cavity:
  - Do not overcook food. Carefully attend appliance when paper, plastic or other combustible materials are placed inside the oven while cooking.
  - Remove wire twist-ties and metal handles from paper or plastic containers before placing them in the oven.
  - Do not use the oven for storage purposes. Do not leave paper products, cooking utensils or food in the oven when not in use.
  - If materials inside the oven ignite, keep the oven door closed, turn the oven off and disconnect the power cord, or shut off power at the fuse or circuit breaker panel. If the door is opened, the fire may spread.
  - Do not use the Sensor Features twice in succession on the same food portion. If food is undercooked after the first countdown, use Time Cook for additional cooking time.

See door surface cleaning instructions in the Care and cleaning of the microwave oven section of this manual.

This appliance must only be serviced by qualified service personnel. Contact nearest authorized service facility for examination, repair or adjustment.

As with any appliance, close supervision is necessary when used by children.

SAVE THESE INSTRUCTIONS

WARNING!

ARCING

If you see arcing, press the CLEAR/OFF pad and correct the problem.

Arcing is the microwave term for sparks in the oven. Arcing is caused by:
- Metal or foil touching the side of the oven.
- Foil not molded to food (upturned edges act like antennas).
- Metal, such as twist-ties, poultry pins or gold-rimmed dishes, in the microwave.
- Recycled paper towels containing small metal pieces being used in the microwave.
IMPORTANT SAFETY INFORMATION.
READ ALL INSTRUCTIONS BEFORE USING.

⚠️ WARNING!

**FOODS**

- Do not pop popcorn in your microwave oven unless in a special microwave popcorn accessory or unless you use popcorn labeled for use in microwave ovens.

- Some products such as whole eggs and sealed containers—for example, closed jars—are able to explode and should not be heated in this microwave oven. Such use of the microwave oven could result in injury.

- Do not boil eggs in a microwave oven. Pressure will build up inside egg yolk and will cause it to burst, possibly resulting in injury.

- Operating the microwave with no food inside for more than a minute or two may cause damage to the oven and could start a fire. It increases the heat around the magnetron and can shorten the life of the oven.

- Foods with unbroken outer “skin” such as potatoes, hot dogs, sausages, tomatoes, apples, chicken livers and other giblets, and egg yolks should be pierced to allow steam to escape during cooking.

- **SUPERHEATED WATER**

  Liquids, such as water, coffee or tea, are able to be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A SPOON OR OTHER UTENSIL IS INSERTED INTO THE LIQUID.

  To reduce the risk of injury to persons:

  — Do not overheat the liquid.

  — Stir the liquid both before and halfway through heating it.

  — Do not use straight-sided containers with narrow necks.

  — After heating, allow the container to stand in the microwave oven for a short time before removing the container.

  — Use extreme care when inserting a spoon or other utensil into the container.

- Avoid heating baby food in glass jars, even with the lid off. Make sure all infant food is thoroughly cooked. Stir food to distribute the heat evenly. Be careful to prevent scalding when warming formula. The container may feel cooler than the formula really is. Always test the formula before feeding the baby.

- Don’t defrost frozen beverages in narrow-necked bottles (especially carbonated beverages). Even if the container is opened, pressure can build up. This can cause the container to burst, possibly resulting in injury.

- Hot foods and steam can cause burns. Be careful when opening any containers of hot food, including popcorn bags, cooking pouches and boxes. To prevent possible injury, direct steam away from hands and face.

- Do not overcook potatoes. They could dehydrate and catch fire, causing damage to your oven.

- Cook meat and poultry thoroughly—meat to at least an INTERNAL temperature of 160°F and poultry to at least an INTERNAL temperature of 180°F. Cooking to these temperatures usually protects against foodborne illness.
MICROWAVE-SAFE COOKWARE

Make sure all cookware used in your microwave oven is suitable for microwaving. Most glass casseroles, cooking dishes, measuring cups, custard cups, pottery or china dinnerware which does not have metallic trim or glaze with a metallic sheen can be used. Some cookware is labeled “suitable for microwaving.”

- If you are not sure if a dish is microwave-safe, use this test: Place in the oven both the dish you are testing and a glass measuring cup filled with 1 cup of water—set the measuring cup either in or next to the dish. Microwave 30–45 seconds at high. If the dish heats, it should not be used for microwaving.

- If you use a meat thermometer while cooking, make sure it is safe for use in microwave ovens.

- Do not use recycled paper products. Recycled paper towels, napkins and waxed paper can contain metal flecks which may cause arcing or ignite. Paper products containing nylon or nylon filaments should be avoided, as they may also ignite.

- Some styrofoam trays (like those that meat is packaged on) have a thin strip of metal embedded in the bottom. When microwaved, the metal can burn the floor of the oven or ignite a paper towel.

- Do not use the microwave to dry newspapers.

- Not all plastic wrap is suitable for use in microwave ovens. Check the package for proper use.

- Paper towels, waxed paper and plastic wrap can be used to cover dishes in order to retain moisture and prevent spattering. Be sure to vent plastic wrap so steam can escape.

- Cookware may become hot because of heat transferred from the heated food. Pot holders may be needed to handle the cookware.

- “Boilable” cooking pouches and tightly closed plastic bags should be slit, pierced or vented as directed by package. If they are not, plastic could burst during or immediately after cooking, possibly resulting in injury. Also, plastic storage containers should be at least partially uncovered because they form a tight seal. When cooking with containers tightly covered with plastic wrap, remove covering carefully and direct steam away from hands and face.

- Use foil only as directed in this manual. TV dinners may be microwaved in foil trays less than 3/4″ high; remove the top foil cover and return the tray to the box. When using foil in the microwave oven, keep the foil at least 1 inch away from the sides of the oven.

- Plastic cookware—Plastic cookware designed for microwave cooking is very useful, but should be used carefully. Even microwave-safe plastic may not be as tolerant of overcooking conditions as are glass or ceramic materials, and may soften or char if subjected to short periods of overcooking. In longer exposures to overcooking, the food and cookware could ignite.

Follow these guidelines:

1. Use microwave-safe plastics only and use them in strict compliance with the cookware manufacturer’s recommendations.
2. Do not microwave empty containers.
3. Do not permit children to use plastic cookware without complete supervision.

GROUNDING INSTRUCTIONS

WARNING—Improper use of the grounding plug can result in a risk of electric shock.

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current.

This appliance is equipped with a power cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Consult a qualified electrician or service technician if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded.

NOTE: Do not use an adapter plug with this appliance.

If the outlet is a standard 2-prong wall outlet, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

Do not under any circumstances cut or remove the third (ground) prong from the power cord.

We do not recommend using an extension cord with this appliance. If the power cord is too short, have a qualified electrician or service technician install an outlet near the appliance. (See EXTENSION CORDS section.)

For best operation, plug this appliance into its own electrical outlet to prevent flickering of lights, blowing of fuse or tripping of circuit breaker.
**EXTENSION CORDS**

A short power supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.

Extension cords may be used if you are careful in using them.

*If an extension cord is used—*

1. The marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance;
2. The extension cord must be a grounding-type 3-wire cord and it must be plugged into a 3-slot outlet;
3. The extension cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over unintentionally.

If you use an extension cord, the interior light may flicker and the blower sound may vary when the microwave oven is on. Cooking times may be longer, too.

**READ AND FOLLOW THIS SAFETY INFORMATION CAREFULLY.**

**SAVE THESE INSTRUCTIONS**
Features of the Oven

1. **Door Latches.**

2. **Window with Metal Shield.** Screen allows cooking to be viewed while keeping microwaves confined in the oven.

3. **Convenience Guide.**

4. **Touch Control Panel Display.**

5. **Door Latch Release.** Press latch release to open door.

6. **Removable Turntable.** Turntable and support must be in place when using the oven. The turntable may be removed for cleaning.

7. **Removable Turntable Support.** The turntable support must be in place when using the oven.

**NOTE:** Rating plate, oven vent(s) and oven light are located on the inside walls of the microwave oven.

**Optional Accessories**

Available at extra cost from your GE supplier. Choose the appropriate Installation Kit below to convert this oven to a built-in wall oven.

About changing the power level.

The power level may be entered or changed immediately after entering the time for **Time Cook** or **Express Cook**.

1. Press **TIME COOK**.
2. Enter cooking time.
3. Press **POWER LEVEL**.
4. Select desired power level 1–10.
5. Press **START**.

Variable power levels add flexibility to microwave cooking. The power levels on the microwave oven can be compared to the surface units on a range. Each power level gives you microwave energy a certain percent of the time. **Power level 7** is microwave energy 70% of the time. **Power level 3** is energy 30% of the time. Most cooking will be done on **High** (power level 10) which gives you 100% power. A high setting (10) will cook faster but food may need more frequent stirring, rotating or turning over. A lower setting will cook more evenly and need less stirring or rotating of the food. Some foods may have better flavor, texture or appearance if one of the lower settings is used. Use a lower power level when cooking foods that have a tendency to boil over, such as scalloped potatoes.

Rest periods (when the microwave energy cycles off) give time for the food to “equalize” or transfer heat to the inside of the food. An example of this is shown with **power level 3**—the defrost cycle. If microwave energy did not cycle off, the outside of the food would cook before the inside was defrosted.

**Here are some examples of uses for various power levels:**

- **High 10**: Fish, bacon, vegetables, boiling liquids.
- **Med-High 7**: Gentle cooking of meat and poultry; baking casseroles and reheating.
- **Medium 5**: Slow cooking and tenderizing for stews and less tender cuts of meat.
- **Low 2 or 3**: Defrosting; simmering; delicate sauces.
- **Warm 1**: Keeping food warm; softening butter.

About the time features.

**Time Cook**

Allows you to microwave for any time up to 99 minutes and 99 seconds.

**Power level 10 (High)** is automatically set, but you may change it for more flexibility.

**Time Cook I**

1. Press **TIME COOK**.
2. Enter cooking time.
3. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
4. Press **START**.

You may open the door during **Time Cook** to check the food. Close the door and press **START** to resume cooking.

**Time Cook II**

Lets you change power levels automatically during cooking. Here’s how to do it:

1. Press **TIME COOK**.
2. Enter the first cook time.
3. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
4. Press **TIME COOK** again.
5. Enter the second cook time.
6. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
7. Press **START**.

At the end of **Time Cook I, Time Cook II** counts down.
# About the time features.

## Cooking Guide for Time Cook

**NOTE:** Use High power level (10) unless otherwise noted.

</table>
### About the time features.

#### Express Cook

This is a quick way to set cooking time for 1–6 minutes. Press one of the Express Cook pads (from 1 to 6) for 1 to 6 minutes of cooking at power level 10. For example, press the 2 pad for 2 minutes of cooking time. The power level can be changed as time is counting down. Press POWER LEVEL and enter 1–10.

#### Add 30 Seconds

You can use this feature two ways:

- It will add 30 seconds to the time counting down each time the pad is pressed.
- It can be used as an express cook for 30 seconds.

### About the auto features.

#### Auto Defrost

Use Auto Defrost for meat, poultry and fish. Use Time Defrost for most other frozen foods.

Auto Defrost automatically sets the defrosting times and power levels to give even defrosting results for meats, poultry and fish weighing up to 6 pounds.

1. Press DEFROST AUTO/TIME.
2. Using the Conversion Guide below, enter food weight. For example, press pads 1 and 2 for 1.2 pounds (1 pound, 3 ounces).
3. Press START.

(Time Defrost is explained in the About the time features section.)

There is a handy guide located on the inside front of the oven.

- Remove meat from package and place on microwave-safe dish.
- When the oven signals, turn the food over. Remove defrosted meat or shield warm areas with small pieces of foil.
- After defrosting, most meats need to stand 5 minutes to complete defrosting. Large roasts should stand for about 30 minutes.

#### Conversion Guide

If the weight of food is stated in pounds and ounces, the ounces must be converted to tenths (.1) of a pound.

About the sensor features.

Humidity Sensor

The Sensor Features detect the increasing humidity released during cooking. The oven automatically adjusts the cooking time to various types and amounts of food.

Do not use the Sensor Features twice in succession on the same food portion—it may result in severely overcooked or burnt food. If food is undercooked after the countdown, use Time Cook for additional cooking time.

- The proper containers and covers are essential for best sensor cooking.

Covered

Always use microwave-safe containers and cover them with lids or vented plastic wrap. Never use tight sealing plastic containers—they can prevent steam from escaping and cause food to overcook.

Vented

Be sure the outside of the cooking containers and the inside of the microwave oven are dry before placing food in the oven. Beads of moisture turning into steam can mislead the sensor.

Dry off dishes so they don’t mislead the sensor.
About the sensor features.

### Popcorn
To use the **Popcorn** feature:

1. Follow package instructions, using **Time Cook** if the package is less than 1.75 ounces or larger than 3.5 ounces. Place the package of popcorn in the center of the microwave.

2. Press **POPCORN**. The oven starts immediately.

If you open the door while **POPCORN** is displayed, a **SENSOR ERROR** message will appear. Close the door and press **START** immediately.

If food is undercooked after the countdown use **TIME COOK** for additional cooking time.

**How to Adjust the Popcorn Program to Provide a Shorter or Longer Cook Time**

If you find that the brand of popcorn you use underpops or overcooks consistently, you can add or subtract 20–30 seconds to the automatic popping time.

**To subtract time:**
After pressing **POPCORN**, press 1 immediately after the oven starts for 20 seconds less cooking time. Press 1 again to reduce cooking time another 10 seconds (total 30 seconds less time).

**To add time:**
After pressing **POPCORN**, press 9 immediately after the oven starts for an extra 20 seconds. Press 9 again to add another 10 seconds (total 30 seconds additional time).

### Beverage
Press **Beverage** to heat an 8–10 oz. cup of coffee or other beverage.

**Drinks heated with the Beverage feature may be very hot. Remove the container with care.**

If food is undercooked after the countdown use **TIME COOK** for additional cooking time.
**Reheat**

The Reheat feature reheats 4–36 ounces of previously cooked foods or a plate of leftovers.

1. Place covered food in the oven. Press **REHEAT**. The oven starts immediately.
2. The oven signals when steam is sensed and the time remaining begins counting down.

Do not open the oven door until time is counting down. If the door is opened, close it and press **START** immediately.

After removing food from the oven, stir, if possible, to even out the temperature. Reheated foods may have wide variations in temperature. Some areas may be extremely hot.

If food is not hot enough after the countdown, use **TIME COOK** for additional reheating time.

**Sensor Cooking**

**Vegetables, Potatoes, Fish, Chicken Pieces**

Sensor cooking gives you easy, automatic results with a variety of foods (see the **Cooking Guide** below).

1. Place covered food in the oven. Press the food pad. For vegetables, press the **VEGETABLE** pad once for fresh vegetables, twice for frozen vegetables or three times for canned vegetables. For chicken or fish, press the **CHICKEN/FISH** pad once for chicken pieces or twice for fish. The oven starts immediately.
2. The oven signals when steam is sensed and the time remaining begins counting down. Turn or stir the food if necessary.

Do not open the oven door until time is counting down. If the door is opened, close it and press **START** immediately.

If food is undercooked after the countdown use **TIME COOK** for additional cooking time.

**How to Change the Automatic Settings (automatic settings for canned vegetables cannot be adjusted)**

You can adjust the cooking time for some foods to suit your personal taste.

**To reduce time by 10%:**
After pressing the feature pad, press 1 immediately after the oven starts.

**To add 10% to cooking time:**
After pressing the feature pad, press 9 immediately after the oven starts.

**Some Foods Not Recommended for Use With Reheat**

It is best to use **Time Cook** for these foods:
- Bread products.
- Foods that must be reheated uncovered.
- Foods that need to be stirred or rotated.
- Foods calling for a dry look or crisp surface after reheating.

### About the other features.

#### Help

The **HELP** pad displays feature information and helpful hints. Press **HELP**, then select a feature pad.

#### Scroll Speed

The scroll speed of the display can be changed. Press and hold the **AM/PM** pad about 3 seconds to bring up the display. Select 1–5 for slow to fast scroll speed.

#### Reminder

The **Reminder** feature can be used like an alarm clock, and can be used at any time, even when the oven is operating. The **Reminder** time can be set up to 24 hours later.

1. Press **REMINDER**.
2. Enter the time you want the oven to remind you. (Be sure the microwave clock shows the correct time of day.)
3. Select AM or PM.
4. Press **REMINDER**. When **Reminder** signal occurs, press **REMINDER** to turn it off. The **Reminder** time may be displayed by pressing **REMINDER**.

**NOTE:** The **REM** indicator will remain lit to show that the **Reminder** is set. To clear the **Reminder** before it occurs, press **REMINDER**, then 0. The **REM** indicator will no longer be lit.

#### Delay Start

**Delay Start** allows you to set the microwave to delay cooking up to 24 hours.

1. Press **DELAY START**.
2. Enter the time you want the oven to start. (Be sure the microwave clock shows the correct time of day.)
3. Select AM or PM.
4. Select any combination of **Auto Defrost**, **Time Defrost** and **Time Cook**.
5. Press **START**.

The **Delay Start** time will be displayed plus **DS**. The oven will automatically start at the delayed time. To cancel the **Delay Start** time, press **CLEAR/OFF**.

The time of day may be displayed by pressing **CLOCK**.
Clock

Press to enter the time of day.

1 Press CLOCK.
2 Enter the time of day.
3 Select AM or PM.
4 Press START or CLOCK.

To check the time of day while microwaving, press CLOCK.

Start/Pause

In addition to starting many functions, START/PAUSE allows you to stop cooking without opening the door or clearing the display.

Timer On/Off

Timer On/Off operates as a minute timer and can be used at any time, even when the oven is operating.

1 Press TIMER ON/OFF.
2 Enter the time you want to count down.
3 Press TIMER ON/OFF to start.

When the time is up, the oven will signal. To turn off the timer signal, press TIMER ON/OFF.

NOTE: The timer indicator will be lit while the timer is operating.

Child Lock-Out

You may lock the control panel to prevent the microwave from being accidentally started or used by children.

To lock or unlock the controls, press and hold CLEAR/OFF for about three seconds. When the control panel is locked, L will appear in the display.
About the other features.

**Display On/Off**

To turn the clock display on or off, press and hold 0 for about 3 seconds. The **Display On/Off** feature cannot be used while a cooking feature is in use.

**Beeper Volume**

The beeper sound level can be adjusted. Press **BEEPER VOLUME**. Choose 0–3 for mute to loud.

**Cooking Complete Reminder**

To remind you that you have food in the oven, the oven will display **FOOD IS READY** and beep once a minute until you either open the oven door or press **CLEAR/OFF**.

Microwave terms.

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arcing</td>
<td>Arcing is the microwave term for sparks in the oven. Arcing is caused by:</td>
</tr>
<tr>
<td></td>
<td>• metal or foil touching the side of the oven.</td>
</tr>
<tr>
<td></td>
<td>• foil that is not molded to food (upturned edges act like antennas).</td>
</tr>
<tr>
<td></td>
<td>• metal such as twist-ties, poultry pins, gold-rimmed dishes.</td>
</tr>
<tr>
<td></td>
<td>• recycled paper towels containing small metal pieces.</td>
</tr>
<tr>
<td>Covering</td>
<td>Covers hold in moisture, allow for more even heating and reduce cooking time. Venting plastic wrap or covering with wax paper allows excess steam to escape.</td>
</tr>
<tr>
<td>Shielding</td>
<td>In a regular oven, you shield chicken breasts or baked foods to prevent over-browning. When microwaving, you use small strips of foil to shield thin parts, such as the tips of wings and legs on poultry, which would cook before larger parts.</td>
</tr>
<tr>
<td>Standing Time</td>
<td>When you cook with regular ovens, foods such as roasts or cakes are allowed to stand to finish cooking or to set. Standing time is especially important in microwave cooking. Note that a microwaved cake is not placed on a cooling rack.</td>
</tr>
<tr>
<td>Venting</td>
<td>After covering a dish with plastic wrap, you vent the plastic wrap by turning back one corner so excess steam can escape.</td>
</tr>
</tbody>
</table>
Care and cleaning of the microwave oven.

Helpful Hints
An occasional thorough wiping with a solution of baking soda and water keeps the inside fresh.
Unplug the cord before cleaning any part of this oven.

How to Clean the Inside
Walls, Floor, Inside Window, Metal and Plastic Parts on the Door
Some spatters can be removed with a paper towel; others may require a damp cloth. Remove greasy spatters with a sudsy cloth, then rinse with a damp cloth. Do not use abrasive cleaners or sharp utensils on oven walls.

To clean the surface of the door and the surface of the oven that come together upon closing, use only mild, nonabrasive soaps or detergents using a sponge or soft cloth. Rinse with a damp cloth and dry.

Never use a commercial oven cleaner on any part of your microwave oven.

Removable Turntable and Turntable Support
To prevent breakage, do not place the turntable into water just after cooking. Wash it carefully in warm, sudsy water or in the dishwasher. The turntable and support can be broken if dropped. Remember, do not operate the oven without the turntable and support in place.

How to Clean the Outside
Do not use cleaners containing ammonia or alcohol on the microwave oven. Ammonia or alcohol can damage the appearance of the microwave oven.

Case
Clean the outside of the microwave oven with a sudsy cloth. Rinse with a damp cloth and then dry. Wipe the window clean with a damp cloth.

Control Panel and Door
Wipe with a damp cloth. Dry thoroughly. Do not use cleaning sprays, large amounts of soap and water, abrasives or sharp objects on the panel—they can damage it. Some paper towels can also scratch the control panel.

Door Surface
It is important to keep the area clean where the door seals against the microwave oven. Use only mild, non-abrasive detergents applied with a clean sponge or soft cloth. Rinse well.

Power Cord
If the cord becomes soiled, unplug and wash with a damp cloth. For stubborn spots, sudsy water may be used, but be certain to rinse with a damp cloth and dry thoroughly before plugging cord into outlet.

Stainless Steel (on some models)
Do not use a steel-wool pad; it will scratch the surface.

To clean the stainless steel surface, use a hot, damp cloth with a mild detergent suitable for stainless steel surfaces. Use a clean, hot, damp cloth to remove soap. Dry with a dry, clean cloth. Always scrub lightly in the direction of the grain.
### Troubleshooting Tips

*Save time and money! Review the chart below and you may not need to call for service.*

**Problem** | **Possible Causes** | **What To Do**
--- | --- | ---
Oven will not start | A fuse in your home may be blown or the circuit breaker tripped. | • Replace fuse or reset circuit breaker.
 | Power surge. | • Unplug the microwave oven, then plug it back in.
 | Plug not fully inserted into wall outlet. | • Make sure the 3-prong plug on the oven is fully inserted into wall outlet.
 | Door not securely closed. | • Open the door and close securely.

Control panel lighted, yet oven will not start | Door not securely closed. | • Open the door and close securely.
 | START pad not pressed after entering cooking selection. | • Press **START**.
 | Another selection entered already in oven and CLEAR/OFF pad not pressed to cancel it. | • Press **CLEAR/OFF**.
 | Cooking time not entered after pressing **TIME COOK**. | • Make sure you have entered cooking time after pressing **TIME COOK**.
 | CLEAR/OFF was pressed accidentally. | • Reset cooking program and press **START**.
 | Food weight not entered after selecting **AUTO DEFROST**. | • Make sure you have entered food weight after selecting **AUTO DEFROST**.
 | Oven was paused accidentally. | • Press **START** to restart the cooking program.

**SENSOR ERROR message appears on display**
During the **Sensor cooking** program, the door was opened or **START/PAUSE** was pressed before steam could be detected. | • Close the door and press **START** immediately.
 | Steam was not detected in maximum amount of time. | • Use **Time Cook** to heat for more time.

**Control panel does not work**
The control has been locked. (When the control panel is locked, an **L** will be displayed.) | • Press and hold **CLEAR/OFF** for about three seconds to unlock the control.

**Food amount too large for Sensor Reheat**
Sensor Reheat is for single servings of recommended foods. | • Use **Time Cook** for large amounts of food.

---

**Things That Are Normal With Your Microwave Oven**

- Steam or vapor escaping from around the door.
- Light reflection around door or outer case.
- Dimming oven light and change in the blower sound at power levels other than high.
- Dull thumping sound while oven is operating.
- TV/radio interference might be noticed while using the microwave. Similar to the interference caused by other small appliances, it does not indicate a problem with the microwave. Plug the microwave into a different electrical circuit, move the radio or TV as far away from the microwave as possible or check the position and signal of the TV/radio antenna.
GE Service Protection Plus™

GE, a name recognized worldwide for quality and dependability, offers you Service Protection Plus™—comprehensive protection on all your appliances—No Matter What Brand!

Benefits Include:
• Backed by GE
• All brands covered
• Unlimited service calls
• All parts and labor costs included
• No out-of-pocket expenses
• No hidden deductibles
• One 800 number to call

You will be completely satisfied with our service protection or you may request your money back on the remaining value of your contract. No questions asked. It’s that simple.

Protect your refrigerator, dishwasher, washer and dryer, range, TV, VCR and much more—any brand! Plus there’s no extra charge for emergency service and low monthly financing is available. Even icemaker coverage and food spoilage protection is offered. You can rest easy, knowing that all your valuable household products are protected against expensive repairs.

Place your confidence in GE and call us in the U.S. toll-free at 800.626.2224 for more information.

*All brands covered, up to 20 years old, in the continental U.S.
Consumer Product Ownership Registration

Dear Customer:
Thank you for purchasing our product and thank you for placing your confidence in us. We are proud to have you as a customer!

Follow these three steps to protect your new appliance investment:

1. Complete and mail your Consumer Product Ownership Registration today. Have the peace of mind of knowing we can contact you in the unlikely event of a safety modification.

2. After mailing the registration below, store this document in a safe place. It contains information you will need should you require service. Our service number is 800.GE.CARES (800.432.2737).

3. Read your Owner’s Manual carefully. It will help you operate your new appliance properly.

Important: If you did not get a registration card with your product, detach and return the form below to ensure that your product is registered, or register online at ge.com.

## GE Microwave Oven Warranty

All warranty service provided by our Factory Service Centers, or an authorized Customer Care technician during normal working hours. To schedule service, on-line, 24 hours a day, visit us at ge.com, or call 800.GE.CARES (800.432.2737). Please have serial and model numbers available when calling for service.

### For The Period Of: GE Will Replace:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>One Year</strong></td>
<td>Any part of the microwave oven which fails due to a defect in materials or workmanship. During this <strong>limited one-year warranty</strong>, GE will also provide, <strong>free of charge</strong>, all labor and related service costs to replace the defective part.</td>
</tr>
<tr>
<td><strong>Five Years</strong></td>
<td>The magnetron tube, if the magnetron tube fails due to a defect in materials or workmanship. During this <strong>five-year limited warranty</strong>, you will be responsible for any labor or in-home service costs.</td>
</tr>
</tbody>
</table>

### What GE Will Not Cover:

- Service trips to your home to teach you how to use the product.
- Improper installation, delivery or maintenance. If you have an installation problem, contact your dealer or installer. You are responsible for providing adequate electrical, exhausting and other connecting facilities.
- Product not accessible to provide required service.
- Failure of the product or damage to the product if it is abused, misused (for example, cavity arcing from wire rack or metal/foil), or used for other than the intended purpose or used commercially.
- Replacement of house fuses or resetting of circuit breakers.
- Damage to the product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage caused by possible defects with this appliance.
- Damage caused after delivery.

EXCLUSION OF IMPLIED WARRANTIES—Your sole and exclusive remedy is product repair as provided in this Limited Warranty. Any implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA. If the product is located in an area where service by a GE Authorized Servicer is not available, you may be responsible for a trip charge or you may be required to bring the product to an Authorized GE Service Location for service. In Alaska, the warranty excludes the service calls to your home.

Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state’s Attorney General.

**Warrantor:** General Electric Company. Louisville, KY 40225
Consumer Support.

GE Appliances Website
Have a question or need assistance with your appliance? Try the GE Appliances Website 24 hours a day, any day of the year! For greater convenience and faster service, you can now download Owner’s Manuals, order parts or even schedule service on-line.

Schedule Service
Expert GE repair service is only one step away from your door. Get on-line and schedule your service at your convenience 24 hours any day of the year! Or call 800.GE.CARES (800.432.2737) during normal business hours.

Real Life Design Studio
GE supports the Universal Design concept—products, services and environments that can be used by people of all ages, sizes and capabilities. We recognize the need to design for a wide range of physical and mental abilities and impairments.
