Cabinet Rough-In Dimensions (in inches)

Cabinet Cut-Out for Sink Dimensions (in inches)

Undersink Dishwasher Wood Insert Dimensions (in inches)

Cabinet Rough-In Note: Either single- or double-bowl sink may be used, centered or offset, as shown in the front view illustration.

The 20-1/2" maximum dimension from wall to front of sink bowl must be accurate if dishwasher is to fit properly under sink. Water lines to sink faucet and drain from sink can be run through area “A.”

HOT WATER line to dishwasher is installed in area “B.”

Garbage disposer, water lines to faucet, trap, waste air gap and water cutoff valve are installed in 12” wide cabinet shown in area “C.” Sink opening for garbage disposer must be dimensioned as shown in front view, area “C” (7-1/2”). This will provide clearance for the disposer and plumbing in cabinet “C” when using double bowl sink.

If the sink bowl is more than 20-1/2” maximum specified distance form the wall, or if the base cabinet is less than the 24” minimum depth from the wall, a gap between the tub front flange and the front of the base cabinet may result.
