If you received a damaged appliance

The warranty does not cover damage caused after delivery.

Immediately contact the dealer (or builder) that sold you the fresh-food refrigerator.

Save time & money

Before you request service, check the Problem Solver in the back of this manual.

It lists causes of minor operating problems that you can correct yourself.

Remove packaging

Before using, be sure all packing materials and tape have been removed.

To assure no damage is done to the finish of the product, the safest way to remove the adhesive left from packaging tape on new appliances is an application of household liquid detergent. Apply with a soft cloth and allow to soak. Wipe dry and then apply an appliance polish to thoroughly clean and protect the surface.

After installation is completed

• Promptly inspect your new Monogram fresh-food refrigerator. If it has been damaged, contact the Installer or Dealer immediately.

• This fresh-food refrigerator must be properly leveled to ensure correct door alignment and door closure. Contact the Installer if the unit is not level.

• The unit should be centered in the opening. In a standard 24” opening, the front face of the Stainless Steel door will be flush with adjacent cabinetry. The front face of the Custom Panel door should be 1-31/44” forward of adjacent cabinetry. Contact the installer if clearance is not correct.

• Test the door swing. Carefully open and close the door. The door should not rub or catch on adjacent cabinetry. Notify the installer if the door makes contact with cabinetry.

Please Contact the Installer or Dealer if you experience any of these problems.

Your custom panel (ZIFI240 model only) fresh-food refrigerator is shipped with two toekicks, a stainless steel and a black toekick. For shipping purposes, one of the toekicks will be secured to the back of the unit and the second will be installed on the unit. Keep the unused toekick and other unused or removed parts for possible future use.
IMPORTANT SAFETY INSTRUCTIONS

Fresh-Food Refrigerator

**WARNING**

To reduce the risk of fire, explosion, electric shock, or injury when using your refrigerator, follow these basic safety precautions:

- Use this appliance only for its intended purpose as described in this Owner’s Manual.
- This refrigerator must be properly installed and located in accordance with the Installation Instructions before it is used.
- Unplug the refrigerator before making repairs, or cleaning.
  
  **NOTE:** Power to the refrigerator cannot be disconnected by any setting on the control panel.
  
  **NOTE:** Repairs must be performed by a qualified Service Professional.
- Do not try to replace a burned-out LED light. An authorized technician will need to replace the LED lights.
- Replace all parts and panels before operating.
- Do not use an extension cord.
- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- To prevent suffocation and entrapment hazards to children, remove the fresh food and freezer doors from any refrigerator before disposing of it or discontinuing its use.
- Children and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge can use this appliance only if they are supervised or have been given instructions on safe use and understand the hazards involved.
- This appliance is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm houses; by clients in hotels, motels, bed & breakfast and other residential environments; catering and similar non-retail applications.

**CAUTION**

To reduce the risk of injury when using your refrigerator, follow these basic safety precautions.

- Do not clean glass shelves or covers with warm water when they are cold. Glass shelves and covers may break if exposed to sudden temperature changes or impact, such as bumping or dropping. Tempered glass is designed to shatter into many small pieces if it breaks.
- Keep fingers out of the “pinch point” areas; clearances between the doors and between the doors and cabinet are necessarily small. Be careful closing doors when children are in the area.

**Installation**

**WARNING**

**EXPLOSION HAZARD**

Keep flammable materials and vapors, such as gasoline, away from refrigerator. Failure to do so can result in fire, explosion, or death.

IMPORTANT SAFETY INSTRUCTIONS

CONNECTION ELECTRICITY

WARNING ELECTRICAL SHOCK HAZARD
Plug into a grounded 3-prong outlet
Do not remove the ground prong
Do not use an adapter
Do not use an extension cord.
Failure to follow these instructions can result in death, fire, or electrical shock.

Do not, under any circumstances, cut or remove the third (ground) prong from the power cord. For personal safety, this appliance must be properly grounded.

The power cord of this appliance is equipped with a 3-prong (grounding) plug which mates with a standard 3-prong (grounding) wall outlet to minimize the possibility of electric shock hazard from this appliance.

Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded.

Where a standard 2-prong wall outlet is encountered, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

Do not use an adapter.

The refrigerator/freezer should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating plate.

A 115 Volt AC, 60 Hz, 15- or 20-amp fused, grounded electrical supply is required. This provides the best performance and also prevents overloading house wiring circuits which could cause a fire hazard from overheated wires.

Never unplug your refrigerator/freezer by pulling on the power cord. Always grip plug firmly and pull straight out from the outlet.

Immediately discontinue use of a damaged supply cord.

If the supply cord is damaged, it must be replaced by a qualified service professional with an authorized service part from the manufacturer.

When moving the refrigerator/freezer away from the wall, be careful not to roll over or damage the power cord.

PROPER DISPOSAL OF YOUR OLD APPLIANCE

WARNING SUFFOCATION AND ENTRAPMENT HAZARD
Failure to follow these disposal instructions can result in death or serious injury.

IMPORTANT: Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous even if they will sit for “just a few days.” If you are getting rid of your old refrigerator, please follow the instructions below to help prevent accidents.

Before You Throw Away Your Old Appliance
■ Take off the fresh food and freezer doors.
■ Leave the shelves in place so that children may not easily climb inside.

Refrigerant and Foam Disposal:
Dispose of appliance in accordance with Federal and Local Regulations. Flammable insulation material used requires special disposal procedures. Contact your local authorities for the environmentally safe disposal of your appliance.

AVERTISSEMENT
Pour réduire le risque d’incendie, d’explosion, de choc électrique ou de blessures lorsque vous utilisez votre réfrigérateur, veuillez suivre ces consignes de sécurité :

- Ce réfrigérateur doit être correctement installé conformément aux Consignes d’Installation avant toute utilisation.
- Débranchez le réfrigérateur avant d’effectuer une réparation, de remplacer une ampoule ou de le nettoyer.
- Remarque : L’alimentation du réfrigérateur ne peut être déconnectée par aucune des fonctions sur le panneau de commande.
- Remarque : Les réparations doivent être effectuées par un professionnel qualifié.
- Remettez toutes les pièces et panneaux en place avant d’utiliser l’appareil.
- N’utilisez pas un cordon de rallonge.
- Abstenez-vous d’entreposer ou d’utiliser de l’essence ou d’autres vapeurs et liquides inflammables aux alentours de cet électroménager ou d’autres appareils.
- N’entreposez pas dans cet électroménager des substances explosives telles que des bombes aérosols qui contiennent un gaz propulseur.
- Pour éviter les risques d’asphyxie et d’enfermement pour les enfants. Démontez les portes du congélateur et du compartiment de réfrigération avant de le mettre au rebut ou d’interrompre son utilisation.
- Afin de prévenir les accidents graves ou la mort, les enfants ne doivent pas se tenir ni jouer dans ou sur l’électroménager.
- Les enfants et les personnes dont les capacités sont réduites sur le plan physique, sensoriel ou mental, ou qui manquent d’expérience ou de connaissances, peuvent utiliser cet électroménager seulement si elles sont surveillées ou ont reçues des consignes de sécurité sur son usage et les risques y sont associés.
- Cet électroménager est conçu pour une utilisation domestique et applications similaires : salle du personnel dans une usine, un bureau ou d’autres lieux de travail; maison de ferme; clients dans un hôtel, un motel, un gîte touristique et d’autres lieux résidentiels; approvisionnement et applications similaires non reliées au commerce de détail.

ATTENTION
Pour réduire le risque de blessures lorsque vous utilisez votre réfrigérateur, veuillez suivre ces consignes de sécurité :

- Ne nettoyez pas les clayettes ou les couvercles en verre avec de l’eau tiède quand ceux-ci sont froids. Les clayettes et couvercles en verre peuvent se casser s’ils sont exposés à des changements soudains de température ou si vous les cognez ou les faites tomber. Le verre trempé est conçu pour se briser en petits morceaux en cas de casse.
- Éloignez les doigts des parties du congélateur où l’on peut facilement se pincer : les espaces entre les portes, et entre les portes et les placards sont toujours étroits. Soyez prudent lorsque vous fermez les portes en présence d’enfants.

INSTALLATION

AVERTISSEMENT
RISQUE D’EXPLOSION
Conservez les matériaux et vapeurs inflammables tels que l’essence à l’écart de votre réfrigérateur. Une explosion, un incendie voire la mort pourrait en résulter.
IMPORTANTES INSTRUCTIONS DE SÉCURITÉ

BRANCHEMENTS ÉLECTRIQUES

AVERTISSEMENT

RISQUE DE CHOC ÉLECTRIQUE

Branchez l’appareil dans une prise triple avec terre.
Ne retirez pas la broche de terre.
N’utilisez pas d’adaptateur.
N’utilisez pas un cordon de rallonge.
Le non-respect de ces instructions peut entraîner des risques d’incendies, des chocs électriques ou la mort.

Ne coupez pas ou n’enlevez pas, sous aucun prétexte, la troisième broche de mise à la terre du cordon d’alimentation. Pour des raisons de sécurité, cet appareil doit être correctement mis à la terre.

Le cordon d’alimentation de cet appareil est équipé d’une fiche à trois broches (pour une mise à la terre) qui s’adapte à la prise de courant standard à 3 broches (pour une mise à la terre) pour minimiser les risques de chocs électriques par cet appareil.

Faites vérifier la prise murale et le circuit électrique par un électricien qualifié pour s’assurer que le système est correctement mis à la terre.

Dans le cas d’une prise biphasée, l’installateur a la responsabilité et l’obligation de la remplacer par une prise triphasée correctement mise à la terre. N’utilisez pas d’adaptateur.

Le réfrigérateur doit toujours être branché à sa propre prise électrique d’une tension nominale correspondant à celle indiquée sur sa plaque signalétique.

Une alimentation électrique à 115 volts CA, 60 Hz, avec un fusible de 15 ou 20 ampères et une mise à la terre est nécessaire. Ceci permet d’obtenir un meilleur rendement et évite de surcharger les circuits électriques du domicile qui risque d’occasionner un incendie en surchauffant.

Ne débranchez jamais le réfrigérateur en tirant sur le cordon d’alimentation. Prenez toujours fermement la fiche en main et tirez pour la sortir de la prise.

Réparez ou remplacez immédiatement tout cordon électrique usé ou endommagé. N’utilisez pas un cordon fissuré ou présentant des dommages dus aux frottements soit sur sa longueur ou aux extrémités.

Lorsque vous éloignez votre réfrigérateur du mur, faites attention à ne pas le faire rouler sur le cordon d’alimentation afin de ne pas l’endommager.

MISE AU REBUT APPROPRIÉE DE VOTRE ANCIEN RÉFRIGÉRATEUR

AVERTISSEMENT

RISQUE DE SUFFOQUER OU D’Y ÊTRE EMPRISONNÉ

Le non-respect de ces instructions d’élimination peut entraîner la mort ou des blessures graves.

IMPORTANT: Les enfants pris au piège ou morts d’asphyxie sont toujours d’actualité. Les réfrigérateurs et congélateurs abandonnés sont toujours aussi dangereux, même si on n’attend que «quelques jours» pour s’en débarrasser. Si vous ne gardez pas votre ancien réfrigérateur ou congélateur, veuillez suivre les directives ci-dessous afin de prévenir les accidents.

Avant de vous débarrasser de votre ancien appareil :

■ Démontez les portes du compartiment de réfrigération et du compartiment de congélation.
■ Laissez les clayettes en place afin d’empêcher les enfants de grimper à l’intérieur.

**Loading tips and suggestions**
**Do not block the thermistor,** located on the right hand side, just above the third shelf of the fresh-food refrigerator. Blocking the thermistor could impair the air circulation and temperature control.
Vegetable pan

The full extension vegetable pan provides constant high humidity levels required to store most fruits and vegetables.

How long produce can be stored will depend upon the type of food and its condition when placed in the pan.

Unlike many refrigerators, the pan may be removed with the door at a 90° angle. This allows you to clean the vegetable pan easier. The vegetable pan is dishwasher safe, top rack only.

To remove the pan from the wire holder:
1. Pull the pan out to the STOP position.
2. Lift the front of the pan up and out of the wire holder.
3. Lift the back of the pan up and out.

To replace a pan in the wire holder:
1. Place the back of the pan in the wire holder, making sure the wire holder fits into the grooves on the back of the pan.
2. Lower the front of the pan into the wire holder.
3. Press firmly on the top of the pan to snap it into the wire holder.
Sabbath Mode

The Sabbath Mode was designed for use on the Jewish Sabbath and Holidays. The Sabbath Mode feature makes it possible for observant Jews to use the fresh-food refrigerator during the duration of the holiday.

The Sabbath Mode feature can be set to override typical reactions caused by your interaction with the fresh-food refrigerator. While in the Sabbath Mode, your appliance will still operate. However, it will not respond to your actions.

While in the Sabbath Mode, you may notice the fan running when the door is opened, however, this is not a result of your actions. The compressor and fan will operate at predetermined times.

ON/OFF - To activate the Sabbath Mode, press and hold down the + and ON/OFF buttons on the control panel for at least 7 seconds. SAb will be displayed on the control. SAb will remain in the display and all the control settings will be frozen and stay in the last mode before entering Sabbath Mode.

Controls and lights will not work until the + and ON/OFF buttons are held again for 7 seconds. The display will show “out” for 1 second and then resume the last operating mode.
For your safety

Door gasket

The vinyl gasket may be cleaned with mild soap and water, a baking soda solution or a mild scouring powder. Rinse well.

After cleaning the door gasket, apply a thin layer of paraffin wax or petroleum jelly to the door gasket at the hinge side. This helps keep the gasket from sticking and bending out of shape.

Light bulb replacement

**WARNING** Electrical Shock Hazard. Turn the fresh-food unit OFF before replacing the light bulb.

**AVERTISSEMENT** Risque de choc électrique. Mettez le réfrigérateur hors tension (OFF) avant de remplacer l’ampoule.

To remove the light shield, push in the tab on the left side of the shield and lower it. Replace with a 15 watt appliance bulb or a 4.5 watt UL Listed LED Lamp or call 800. GE.CARES (800.432.2737) during normal business hours to order service part.

In the event of a power failure

If the power fails, open the door as infrequently as possible to maintain the temperature.

Preparing for vacation

For long vacations or absences, remove food and turn the fresh-food refrigerator OFF. Clean the interior (see Cleaning the Inside section).

For shorter vacations, remove perishable foods and leave controls at regular settings. However, if the room temperature is expected to drop below 60°F (16°C), follow the same instructions as for long vacations.

Preparing to move

Secure all loose items such as shelves and drawers by taping them securely in place to prevent damage.

Be sure the fresh-food refrigerator stays in an upright position during moving.
**WARNING**  Electrical Shock Hazard.

Turn the fresh-food refrigerator OFF or unplug the unit before cleaning.

Turn the fresh-food refrigerator OFF by pressing the button on the control panel a minimum of 3 seconds until the light and temperature display turn off.

**For your safety**

---

**Cleaning the outside**

Door handles and trim—Clean with a cloth dampened with soapy water. Dry with a soft cloth.

Keep the outside clean. Wipe with a clean cloth lightly dampened with mild liquid dish detergent. Dry with a clean, soft cloth.

Do not wipe the refrigerator with a soiled dish cloth or wet towel. These may leave a residue that can damage the finish. Do not use scouring pads, powdered cleaners, bleach or cleaners containing bleach because these products can scratch and damage the finish.

Stainless Steel—The stainless steel doors and door handles (on some models) can be cleaned with a commercially available stainless steel cleaner. Cleaners with oxalic acid such as Bar Keepers Friend Soft Cleanser™ will remove surface rust, tarnish, and small blemishes. Use only a liquid cleaner free of grit and rub in the direction of the brush lines with a damp soft sponge. Do not use appliance wax or polish on the stainless steel.

---

**Cleaning the inside**

Unplug the fresh-food refrigerator before cleaning. If this is not practical, turn the unit OFF and wring excess moisture out of the cloth or sponge when cleaning around lights or controls.

Use warm water and baking soda solution—about a tablespoon (15 ml) of baking soda to a quart (1 liter) of water. This both cleans and neutralizes odors. Thoroughly rinse and wipe dry.

Other parts of the fresh-food refrigerator—including the door gaskets, vegetable pan and glass shelves—can be cleaned the same way.

---

**Drain hole**

Periodically check the drain hole and channel for any debris. If the drain is blocked, condensation will not drain properly.

**To check and clean the drain hole**, remove the bottom two glass shelves. Sweep a damp cloth along the channel in the back of the fresh-food refrigerator. Use a finger to sweep away any debris from the drain hole.

Normal operating sounds

Newer appliances sound different from older appliances. Modern appliances have more features and use newer technology.

Do you hear what I hear? These sounds are normal.

HUMMM... WHOOSH...

- The new high efficiency compressor may run faster and longer than your old appliance and you may hear a high-pitched hum or pulsating sounds while it is operating.
- Sometimes the appliance runs for an extended period, especially when the doors are opened frequently.
- You may hear a whooshing sound when the doors close. This is due to pressure equalizing within the appliance.
- The cabinet fan runs continuously except when the door is opened.

CLICKS, POPS, CRACKS and CHIRPS

- You may hear cracking or popping sounds when the appliance is first plugged in. This happens as the appliance cools to the correct temperature.
- The electronic control board may cause a clicking sound when relays activate to control appliance components.
- Expansion and contraction of cooling coils during and after defrost can cause cracking or popping sounds.

WATER SOUNDS

- The flow of refrigerant through the freezer cooling coils may make a gurgling noise like boiling water.
- Water dropping on the defrost heater can cause a sizzling, popping or buzzing sound during the defrost cycle.
- A water dripping noise may occur during the defrost cycle as ice melts from the evaporator and flows into the drain pan.
- Closing the door may cause a gurgling sound due to pressure equalization.

WHIR!

- You may hear the fans spinning at high speeds. This happens when the appliance is first plugged in, when the door is opened frequently or when a large amount of food is added to the appliance. The fans help maintain desired temperatures.
- If the door is open for over 3 minutes, you may hear the fans come on in order to cool the light bulbs.
- The fans change speeds in order to provide optimal cooling and energy savings.
