UCC15NJII

15" Built-In Gourmet Clear Ice Maker

INSTALLATION INFORMATION

The ice machine can be used free-standing or as a built-in, under the countertop.

The ice machine requires a 115 Volt, 60 Hz., AC only power supply, with an individual, properly grounded branch circuit, protected by a 15 amp fuse or circuit breaker.

To achieve a custom appearance, the ice machine door accepts 3/4” custom panels to coordinate or contrast with cabinetry. Optional door panels and handle kits are available. Order PIP70SS for stainless steel door panel kit with Profile handle, ZIP8SS for stainless steel door panel kit with Monogram Statement handle, ZIS8SS for stainless steel door panel kit with Monogram Minimalist handle.

NOTE:
The ice machine is equipped with a gravity drain to prevent water from flowing back into the ice storage bin. A drain pump is necessary when a floor drain is not available. Order UPK3 Drain Pump Kit.
