HELPFUL TIPS

A. Note this cooktop is only approved for installation above specific wall ovens as labeled on the wall oven.

B. Warming drawers are approved for installation below only certain specified cooktop models. See the label attached to the top of the warming drawer for approved combinations.

C. Refer to cooktop installation instructions.

D. Maintain a minimum distance of 31-1/4” from the top surface of the countertop to the wall oven platform to ensure that the cooktop and wall oven do not interfere with each other (see picture).

E. The cooktop platform must be a minimum height of 4-3/4” from the floor to ensure that the handle does not hit the floor when the door is open.

F. Junction box location for wall oven (may also be located in adjacent cabinet).

G. Electrical connection for cooktop must be located in an accessible adjacent location to the right (may also be located in adjacent cabinet).

H. When installing the cooktop above a warming drawer, a solid barrier must be installed at least 5-1/2” from the top of the countertop. Use any solid material such as 1/4” thick plywood. Allow at least a 2” air gap between the front of the barrier and the inside of the cabinet and at least 1/4” air gap between the barrier and the top of the warming drawer.

For more details, refer to the installation instructions for this product on Monogram.com. Dimensions in parentheses are in centimeters unless otherwise noted.
