SPEEDCOOK TECHNOLOGY
Uses halogen light to cook foods to delicious perfection—two to four times faster than a conventional oven—no preheating required

FOUR POWERFUL OVENS IN ONE
Speedcook, true European convection, sensor microwave and warming/proofing—offer the ultimate in cooking speed and versatility

EASY-TO-USE-CONTROLS
Make it easy to select from more than 175 preprogrammed recipes

SPACIOUS INTERIOR
With 13.6” turntable and two full-width oven racks easily accommodates a roast or three 8-1/2” x 11” casserole dishes

FOUR-SPEED, 300-CFM VENTING SYSTEM
Efficiently clears away smoke and steam from the cooktop

CONVENIENT TASK LIGHTING
Provides three levels of illumination to suit your needs

FLEXIBLE ABOVE-THE-COOKTOP CONFIGURATION
Makes the most of your kitchen space
INSTALLATION INFORMATION:

This information is not intended to be used for installing unit described. Before installing, consult installation instructions packed with product/kit for current dimensional data.

Note: Outside venting is optional. Vent (duct) can be horizontal or vertical.

IMPORTANT:

Please read carefully. For personal safety, This Appliance Must be properly grounded to avoid severe or fatal shock.

Do not, under any circumstances, cut, deform, or remove any of the prongs from the power cord. Do not use with an extension cord.

NEMA 14-30R WALL RECEPTACLE

Dimensions in parentheses are in centimeters unless otherwise noted. Actual product dimensions may vary due to manufacturing tolerances.
OPTIONAL ACCESSORIES

FILTER KIT

**JX81D-RECIRCULATING CHARCOAL FILTER KIT**
To be used when the Advantium oven cannot be vented to the outside.

FILLER PANEL KITS JX36B
When replacing a 36" range hood, this kit fills in the additional width to provide a custom built-in appearance. For installation between cabinets only; not for end-of-cabinet installation. Each kit contains two 3"-wide filler panels.

HELPFUL TIPS

HOOD EXHAUST DUCT
Outside ventilation requires a hood exhaust duct. Read the following carefully.

EXHAUST CONNECTION:
The hood exhaust has been designed to mate with a standard 3-1/4” x 10” rectangular duct.
If a round duct is required, a rectangular-to-round transition adaptor must be used. Do not use less than a 6” diameter duct.

REAR EXHAUST:
If a rear or horizontal exhaust is to be used, care should be taken to align exhaust with the space between studs, or wall should be prepared at the time it is constructed by leaving enough space between the wall studs to accommodate exhaust.

MAXIMUM DUCT LENGTH:
For satisfactory air movement, the total duct length of 3-1/4” x 10” rectangular or 6” diameter round duct should not exceed 140 equivalent feet.

ELBOWS, TRANSITIONS, WALL AND ROOF CAPS, etc., present additional resistance to airflow and are equivalent to a section of straight duct which is longer than their actual physical size. When calculating the total duct length, add the equivalent length of all transitions and adaptors plus the length of all straight duct sections. The chart below shows the approximate feet of equivalent length of some typical ducts.
