MONOGRAM 27" WARMING DRAWER
ZJ7000SJSS

1.6 CU. FT. CAPACITY

"ON" INDICATOR LIGHT

INFINITE SETTING TEMPERATURE CONTROL
75 Degrees to 230 Degrees

VARIABLE HUMIDITY CONTROL
Crisp to Moist

REMOVABLE HALF RACK

STAINLESS STEEL DRAWER FRONT WITH TUBULAR HANDLE

FULL EXTENSION DRAWER ON BALL BEARING GLIDES

VARIABLE INSTALLATION OPTIONS

ON/OFF ROCKER SWITCH
OVERALL DIMENSIONS

For more details refer to the installation instructions for this product.

ATTENTION ELECTRICIAN:

This appliance is supplied with a 56" (142.2 cm) long electrical cord equipped with a 3-prong (grounding) plug that mates to a standard 3-prong grounding wall outlet.

The electrical power cord is located on the right side of the warming drawer. Locate the wall outlet within easy reach of the electrical cord in an adjacent cabinet, within 42" (106.7 cm) of the right side or 16" (40.6 cm) from the left side of the cut-out. A recessed outlet can be installed on the right side of the cut-out, 7" (17.8 cm) max. from the rear of the cabinet.

DO NOT USE AN EXTENSION CORD WITH THIS PRODUCT.

For questions about your appliance, please call 1-800-626-2000.

HELPFUL TIPS

A. Warming drawers are approved for installation below only certain specified wall oven and cooktop models. See the label attached to the top of the warming drawer for approved combinations.

B. Additional clearance between cut-outs may be required. Check to be sure that oven supports above the warming drawer location do not obstruct the required interior 23–1/2” depth and 9–1/4” height.

C. If you are installing in frameless cabinets, it may be necessary to install 1/2” wide cleats to accept drawer mounting screws. See drawer for mounting screw locations.

D. Install a 2”x2” or 2”x4” Anti-tip block against rear wall, 9” from floor of cutout to bottom of block. The anti-tip block must be installed to prevent the drawer from tipping forward when opened and loaded. Failure to add the anti-tip block could result in personal injury.

E. When installing the warming drawer below a cooktop, a solid barrier must be installed at least 1” from the lowest point of the bottom of cooktop burner box to the top of the cut-out. Use any solid material such as 1/4” thick plywood. Allow at least 1/4” air gap between the barrier and the top of the warming drawer.

For more details refer to the installation instructions for this product.

**HELPFUL TIPS**

A. If you are installing in frameless cabinets, it may be necessary to install 1/2" wide cleats to accept drawer mounting screws. See drawer for mounting screw locations.

B. Install a 2"x2" or 2"x4" anti-tip block against rear wall, 9" from floor of cutout to bottom of block. The anti-tip block must be installed to prevent the drawer from tipping forward when opened and loaded. Failure to add the anti-tip block could result in personal injury.

C. When installing the warming drawer below a cabinet drawer, a solid barrier must be installed at least above the warming drawer to block access. Use any solid material such as 1/4" thick plywood. Allow at least 1/4" air gap between the barrier and the top of the warming drawer. Observe the 5" min. above the floor or 1" min. above the toe kick installation height.

D. When installing two warming drawers side by side, install them in separate cut-outs and allow a 2" min. gap between each cut-out.

E. The warming drawer may be supported by either a solid bottom or 2"x2" or 2"x4" runners. The support must be level and rigidly mounted, flush with the bottom edge of the cut-out (there is no way to level the drawer once it has been installed, so make sure that the supports are level). The floor or runners must be capable of supporting at least 150 lbs.

For more details refer to the installation instructions for this product.
HELPFUL TIPS

This kit contains a stainless steel statement style panel with a handle and lamp jewel embedded in the bottom right side. This is a one-piece assembly that replaces the original drawer front and tubular handle. The original tubular handle (or a custom handle) cannot be installed onto this professional drawer panel. The ZXD9027PN kit is designed to fit 27” warming drawers manufactured after February 2015.

For more details refer to the installation instructions for this product.
