# ENERGYGUIDE

Dishwasher  
Capacity: Standard

Models HDA2000, 2100, 2200,  
3200, 3400, 3500

Compare the Energy Use of this Dishwasher  
with Others Before You Buy.

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size dishwashers are used in this scale.

Dishwashers using more energy cost more to operate.  
This model's estimated yearly operating cost is:

**\$58**

**\$32**

when used with an electric water heater      when used with a natural gas water heater

Based on six washloads a week and a 1997 U.S. Government national average cost of 8.31¢ per kWh for electricity and 61.2¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305).
