**Energy use (kWh/year) range of all similar models**

**Uses Least  
Energy**  
**312**

**Uses Most  
Energy**  
**573**

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size dishwashers are used in this scale.

Dishwashers using more energy cost more to operate.  
This model's estimated yearly operating cost is:

**\$34**

**\$20**

when used with an electric water heater      when used with a natural gas water heater

Based on five washloads a week, and a 2002 U.S. Government national average cost of \$0.0828 per kWh for electricity and \$0.656 per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305).
