NOTE: IT IS VERY IMPORTANT TO READ AND FOLLOW THE DIRECTIONS IN THE INSTALLATION INSTRUCTIONS BEFORE PROCEEDING WITH THIS TOP CABINET TEMPLATE.

CUT WALL TEMPLATE FROM TOP CABINET TEMPLATE ALONG WITH THE DASHED CUTTING LINE. REFER TO FIGURE 5 FOR DRAWING LOCATION.

This template is for locating the horizontal exhaust cutout. Do not use the template for vertical or recirculation exhaust.

1. Place the template on against the rear wall, aligning the circles A, B, & C, with the corresponding holes in the rear wall. Move A, B, & C, of the cabinet template to fit the holes in these blocks to line up with A. & C. Place the blocks so that the holes in each block line up with the circles A, B, & C.

2. Drill 3/8" diameter holes at A., B. & C.

CAUTION: Wear safety goggles when drilling holes in the cabinet bottom.

NOTE: Make sure the rear of the template touches the back wall (for smooth, flat bottom cabinets) or the back of the recess (for recessed bottom cabinets) after cutting the edges of the template.

3. Drill a 2" diameter hole at D for power cord. If cabinets are metal, use the nylon grommet (see the Parts Included section in the Installation Instructions) to surround the opening to protect the cord.

4. FOR VERTICAL EXHAUST ONLY. Cut out the shaded area labeled E. in the cabinet bottom for Vertical (Outside) Exhaust location.

5. FOR VERTICAL EXHAUST ONLY. Cut out the shaded area labeled E. in the cabinet bottom for Vertical (Outside) Exhaust location.

6. Remove the top cabinet template. 7. For recessed cabinets, make 2 filler blocks out of scrap wood the size of the shaded areas F. & G.

NOTE: IT IS VERY IMPORTANT TO READ AND FOLLOW THE DIRECTIONS IN THE INSTALLATION INSTRUCTIONS BEFORE PROCEEDING WITH THIS TOP CABINET TEMPLATE.

This template is for locating the horizontal exhaust cutout. Do not use the template for vertical or recirculation exhaust.

1. Determine if your cabinet has a recessed area (Fig. 1) or a smooth, flat bottom (Fig. 3). If smooth, tape template onto the back wall. It is important that the edges of the cabinets permit level installation of the oven. Follow directions below for cutting and mounting:

RECOMMENDED CUTTING PROCEDURE

Measure cabinet thickness of the sides A & C and the back B. Cut the edge of the template to fit the corresponding holes in the cabinet. It is important that the edges of the cabinets permit level installation of the oven. Follow directions below for cutting and mounting:

NOTE: Make sure the rear of the template touches the back wall (for smooth, flat bottom cabinets) or the back of the recess (for recessed bottom cabinets) after cutting the edges of the template.

NOTE: On some cabinets a small bracket or glue block is used between the overhang and the underside of the cabinet bottom. Cut the template to fit around the bracket or glue block so it is level as the bottom edge of the wall cabinet frame (Fig. 5).

8. Return to and proceed with the Installation Instructions.
