kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size dishwashers are used in this scale.

Dishwashers using more energy cost more to operate.
This model's estimated yearly operating cost is:

\$37

\$23

when used with an electric water heater when used with a natural gas water heater

Based on five washloads a week and a 2002 U.S. Government national average cost of 8.28¢ per kWh for electricity and 65.6¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before the consumer purchase violates the Federal Trade Commissions Appliance Labelling Rule. (16 C.F.R. Part 305)
