For Your Safety

**PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY**

For your safety the information in this manual must be followed to minimize the risk of fire or explosion or to prevent property damage, personal injury or loss of life.

*Do Not Attempt* to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

*Do Not Place* any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.

*Do Not Operate* the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:

1. door (bent),
2. hinges and latches (broken or loosened),
3. door seals and sealing surfaces.

*The Oven Should Not* be adjusted or repaired by anyone except properly qualified service personnel.
Welcome to the GE family. We’re proud of our quality products and we believe in dependable service. You’ll see it in this easy-to-use manual and you’ll hear it in the friendly voices of our customer service department.

Best of all, you’ll experience these values each time you use your microwave. That’s important, because your new microwave will be part of your family for a long time.

Start Here!

Before using your microwave oven

Staple your receipt to the inside back cover of this manual.

Write down the model and serial numbers here. They are on a label inside the oven.

---

Before you call for service, there are a few things you can do to help us serve you better.

Read this manual. It contains instructions to help you use and maintain your microwave properly.

If you received a damaged oven...Immediately contact the dealer (or builder) that sold you the oven.

Save time and money. Check the section titled “If Something Goes Wrong” before calling. This section was designed to solve common problems you might encounter.

If you do need service, you can relax knowing help is only a phone call away. A list of toll-free customer service numbers is included in the back of this book. Or call the GE Answer Center® at 800.626.2000, 24 hours a day, 7 days a week.

Important Safety Information

Read all safety information before using

Warning

To reduce the risk of fire, electric shock, injury to persons, or exposure to excessive microwave energy when using your appliance, follow basic precautions, including the following sections.

Safety Precautions

- Read and follow the specific “Precautions to Avoid Possible Exposure to Excessive Microwave Energy.”
- This appliance must be grounded. Connect only to properly grounded outlet. See Grounding Instructions section.
- Do not mount this appliance over a sink.
- Install or locate this appliance only in accordance with the provided Installation Instructions.
- This over-the-range oven was designed for use over ranges no wider than 42 inches. It may be installed over both gas and electric cooking equipment.
- Do not operate this appliance if it has a damaged power cord or plug, if it is not working properly, or if it has been damaged or dropped.
- Use this appliance only for its intended use as described in this guide. Do not use corrosive chemicals or vapors in this appliance. This microwave oven is specifically designed to heat or cook food, and is not intended for laboratory or industrial use.
- Do not store this appliance outdoors. Do not use this product near water—for example, in a wet basement, near a swimming pool or near a sink.
- Do not cover or block any openings on the appliance.
- Keep power cord away from heated surfaces.
- Do not immerse power cord or plug in water.

This microwave oven is UL listed for installation over electric and gas ranges.

This microwave oven is not approved or tested for marine use.
• To reduce the risk of fire in the oven cavity:
  — Do not overcook food. Carefully attend appliance if paper, plastic or other combustible materials are placed inside the oven while cooking.
  — Remove wire twist-ties and metal handles from paper or plastic containers before placing them in the oven.
  — Do not use the oven for storage purposes. Do not leave paper products, cooking utensils or food in the oven when not in use.
  — If materials inside oven should ignite, keep the oven door closed, turn the oven off and disconnect the power cord, or shut off power at the fuse or circuit breaker panel. If the door is opened, the fire may spread.

• See door surface cleaning instructions in the Care and Cleaning section(s) of this guide.

• This appliance should be serviced only by qualified service personnel. Contact nearest authorized service facility for examination, repair or adjustment.

• As with any appliance, close supervision is necessary when used by children.

SAVE THESE INSTRUCTIONS
Arcing is the microwave term for sparks in the oven. Arcing is caused by:

- The temperature probe in the microwave but not inserted in the food.
- The metal shelf not installed correctly so it touches the microwave wall.
- Metal or foil touching the side of the oven.
- Foil not molded to food (upturned edges act like antennas).
- Metal, such as twist ties, poultry pins, or gold-rimmed dishes, in the microwave.
- Recycled paper towels containing small metal pieces being used in the microwave.

**Foods**

- Do not pop popcorn in your microwave oven unless in a special microwave popcorn accessory or unless you use popcorn labeled for use in microwave ovens.
- Some products such as whole eggs and sealed containers—for example, closed jars—will explode and should not be heated in this microwave oven. Such use of the microwave oven could result in injury.
- Do not boil eggs in a microwave oven. Pressure will build up inside egg yolk and will cause it to burst, possibly resulting in injury.
- Operating the microwave with no food inside for more than a minute or two may cause damage to the oven and could start a fire. It increases the heat around the magnetron and can shorten the life of the oven.
- Foods with unbroken outer “skin” such as potatoes, hot dogs, sausages, tomatoes, apples, chicken livers and other giblets, and egg yolks should be pierced to allow steam to escape during cooking.
- Avoid heating baby food in glass jars, even with the lid off. Make sure all infant food is thoroughly cooked. Stir food to distribute the heat evenly. Be careful to prevent scalding when warming formula or breast milk. The container may feel cooler than the milk really is. Always test the milk before feeding the baby.
Spontaneous boiling—Under certain special circumstances, liquids may start to boil during or shortly after removal from the microwave oven. To prevent burns from splashing liquid, we recommend the following: before removing the container from the oven, allow the container to stand in the oven for 30 to 40 seconds after the oven has shut off. Do not boil liquids in narrow-necked containers such as soft drink bottles, wine flasks and especially narrow-necked coffee cups. Even if the container is opened, excessive steam can build up and cause it to burst or overflow.

Don’t defrost frozen beverages in narrow-necked bottles (especially carbonated beverages). Even if the container is opened, pressure can build up. This can cause the container to burst, possibly resulting in injury.

Hot foods and steam can cause burns. Be careful when opening any containers of hot food, including popcorn bags, cooking pouches and boxes. To prevent possible injury, direct steam away from hands and face.

Do not overcook potatoes. They could dehydrate and catch fire, causing damage to your oven.

Cook meat and poultry thoroughly—meat to at least an INTERNAL temperature of 160°F. and poultry to at least an INTERNAL temperature of 180°F. Cooking to these temperatures usually protects against foodborne illness.

SAFETY FACT

SUPERHEATED WATER

Microwaved water and other liquids do not always bubble when they reach the boiling point. They can actually get superheated and not bubble at all.

Superheated liquid will bubble up out of the cup when it is moved or when something like a spoon or tea bag is put into it.

To prevent this from happening and causing injury, do not heat any liquid for more than 2 minutes per cup. After heating, let the cup stand in the microwave for 30 seconds before moving it or putting anything into it.
Make sure all cookware used in your microwave oven is suitable for microwaving. Most glass casseroles, cooking dishes, measuring cups, custard cups, pottery or china dinnerware which does not have metallic trim or glaze with a metallic sheen can be used. Some cookware is labeled “suitable for microwaving.”

- If you are not sure if a dish is microwave-safe, use this test: Place in the oven both the dish you are testing and a glass measuring cup filled with 1 cup of water—set the measuring cup either in or next to the dish. Microwave 1 minute at high. If the dish heats, it should not be used for microwaving. If the dish remains cool and only the water in the cup heats, then the dish is microwave-safe.

- Do not use recycled paper products. Recycled paper towels, napkins and waxed paper can contain metal flecks which may cause arcing or ignite. Paper products containing nylon or nylon filaments should be avoided, as they may also ignite.

- Some styrofoam trays (like those that meat is packaged on) have a thin strip of metal embedded in the bottom. When microwaved, the metal can burn the floor of the oven or ignite a paper towel.

- Do not use the microwave to dry newspapers.

- Not all plastic wrap is suitable for use in microwave ovens. Check the package for proper use.

- Paper towels, waxed paper and plastic wrap can be used to cover dishes in order to retain moisture and prevent spattering. Be sure to vent plastic wrap so steam can escape.

- Cookware may become hot because of heat transferred from the heated food. Pot holders may be needed to handle the cookware.

- “Boilable” cooking pouches and tightly closed plastic bags should be slit, pierced or vented as directed by package. If they are not, plastic could burst during or immediately after cooking, possibly resulting in injury. Also, plastic storage containers should be at least partially uncovered because they form a tight seal. When cooking with containers tightly covered with plastic wrap, remove covering carefully and direct steam away from hands and face.

- Use foil only as directed in this guide. TV dinners may be microwaved in foil trays less than 3/4” high; remove the top foil cover and return the tray to the box. When using foil in the microwave oven, keep the foil at least 1 inch away from the sides of the oven.
• Plastic cookware—Plastic cookware designed for microwave cooking is very useful, but should be used carefully. Even microwave-safe plastic may not be as tolerant of overcooking conditions as are glass or ceramic materials and may soften or char if subjected to short periods of overcooking. In longer exposures to overcooking, the food and cookware could ignite.

Follow these guidelines:

1. Use microwave-safe plastics only and use them in strict compliance with the cookware manufacturer’s recommendations.
2. Do not microwave empty containers.
3. Do not permit children to use plastic cookware without complete supervision.

The Vent Fan

The fan will operate automatically under certain conditions (see Automatic Fan feature). Take care to prevent the starting and spreading of accidental cooking fires while the vent fan is in use.

• Clean the underside of the microwave often. Do not allow grease to build up on the microwave or the fan filters.

• In the event of a grease fire on the surface units below the microwave oven, smother a flaming pan on the surface unit by covering the pan completely with a lid, a cookie sheet or a flat tray.

• Use care when cleaning the vent fan filters. Corrosive cleaning agents, such as lye-based oven cleaners, may damage the filters.

• When preparing flaming foods under the microwave, turn the fan on.

• Never leave surface units, beneath your microwave oven, unattended at high heat settings. Boilovers cause smoking and greasy spillovers that may ignite and spread if the microwave vent fan is operating. To minimize automatic fan operation, use adequate sized cookware and use high heat on surface units only when necessary.
**Important Safety Information**

**Grounding Instructions**

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a power cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Consult a qualified electrician or service technician if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded.

**Optional Accessories**

Available at extra cost from your GE supplier.

**Filler Panel Kits**

- **JX40WH—White**
- **JX41—Black**
- **JX40AL—Almond**

When replacing a 36” or 42” range hood, this kit fills in the additional width to provide a custom built-in appearance. For installation between cabinets only; not for end-of-cabinet installation. Each kit contains two 3”-wide filler panels. Two kits are needed for a 42” opening.

If the outlet is a standard 2-prong wall outlet, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

Do not under any circumstances cut or remove the third (ground) prong from the power cord.

Do not use an adapter plug with this appliance.

Do not use an extension cord with this appliance. If the power cord is too short, have a qualified electrician or service technician install an outlet near the appliance.

For best operation, plug this appliance into its own electrical outlet to prevent flickering of lights, blowing of fuse or tripping of circuit breaker.

- **Filter Kits**
  - **JX81A—Recirculating Charcoal Filter Kit**
  To be used when the microwave oven cannot be vented to the outside.

- **Decorative Panel Kit**
  - **JX22SS—Stainless Steel**
  When replacing a Hi/Low range, this panel kit fills in the area between the microwave and the range left by the Hi/Low model.
Features of Your Microwave

1 Temperature Probe (on some models). Use with Temp Cook and Roast functions only.

2 Shelf (on some models). Lets you microwave several foods at once. Food microwaves best when placed directly on the turntable.

3 Door Handle. Pull to open the door. The door must be securely latched for the microwave to operate.

4 Door Latches.

5 Window with Metal Shield. Screen allows cooking to be viewed while keeping microwaves confined in the oven.

6 Outlet for Temperature Probe (on some models). Probe must be securely inserted into the outlet before the oven will Temp Cook or Roast.

7 Touch Control Panel (panel layout will vary by model).

8 Cooktop Lights.

9 Grease Filters.

10 Removable Turntable (on some models). Turntable and support must be in place when using the oven. The turntable may be removed for cleaning.

11 Convenience Guide.

12 Glass Cooking Tray. On models without a turntable.

NOTE: Rating plate, oven vent(s) and oven light are located on the inside walls of the microwave oven.
Quick Start (Features and appearance vary by model)

Food weight
Variable power levels add flexibility to your microwave cooking. The power levels on your microwave oven can be compared to the surface units on a range. High (Power Level 10) or full power is the fastest way to cook and gives you 100% power. Each power level gives you microwave energy a certain percent of the time. Power Level 7 is microwave energy 70% of the time. Power Level 3 is energy 30% of the time.

A high setting (10) will cook faster but food may need additional attention such as frequent stirring, rotating or turning over. Most of your cooking will be done on High (Power Level 10). A lower setting will cook more evenly and with less attention given to stirring or rotating the food.

Some foods may have better flavor, texture or appearance if one of the lower settings is used. You may wish to use a lower power level when cooking foods that have a tendency to boil over, such as scalloped potatoes.

Rest periods (when the microwave energy cycles off) give time for the food to “equalize” or transfer heat to the inside of the food. An example of this is shown with Power Level 3—the defrost cycle. If microwave energy did not cycle off, the outside of the food would cook before the inside was defrosted.

Here are some examples of uses for various power levels:

<table>
<thead>
<tr>
<th>Power Level</th>
<th>Best Uses</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>High 10</strong></td>
<td>Fish, bacon, vegetables, boiling liquids.</td>
</tr>
<tr>
<td><strong>Med-High 7</strong></td>
<td>Gentle cooking of meat and poultry; baking casseroles and reheating.</td>
</tr>
<tr>
<td><strong>Medium 5</strong></td>
<td>Slow cooking and tenderizing such as stews and less tender cuts of meat.</td>
</tr>
<tr>
<td><strong>Low 2 or 3</strong></td>
<td>Defrosting without cooking; simmering; delicate sauces.</td>
</tr>
<tr>
<td><strong>Warm 1</strong></td>
<td>Keeping food warm without overcooking; softening butter.</td>
</tr>
</tbody>
</table>
**Micro Cook**

**Micro Cook I**
Allows you to microwave for any time up to 99 minutes and 99 seconds.

Power Level 10 (High) is automatically set, but you may change it for more flexibility.

You may open the door during Micro Cook to check the food. Close the door and press START to resume cooking.

1. Press **MICRO COOK I & II**.
2. Enter cooking time.
3. Change power level if you don’t want full power. (Press **POWER LEVEL**. Enter a desired power level 1–10.)
4. Press **START**.

**Micro Cook II**
Lets you change power levels automatically during cooking. Here’s how to do it:

1. Press **MICRO COOK I & II**.
2. Enter the first cook time.
3. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
4. Press **MICRO COOK I & II** again.
5. Enter the second cook time.
6. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a power level 1–10.)
7. Press **START**.

At the end of MICRO COOK I, MICRO COOK II counts down.
### Operating Instructions

**Cooking Guide for Micro Cook I & II**

**NOTE: Use Power Level High (10) unless otherwise noted.**

</tbody>
</table>
**Time Features**

**Time Defrost**

Allows you to defrost for the length of time you select. See the Defrosting Guide for suggested times.

Power Level 3 is automatically set, but you may change this for more flexibility. You may defrost small items more quickly by raising the power level after entering the time. However, they will need more frequent attention than usual. Power Level 7 cuts the total defrosting time in about half; Power Level 10 cuts the total time to approximately 1/3. Rotate or stir food frequently.

At one half of selected defrosting time, the oven signals TURN. At this time, turn food over and break apart or rearrange pieces for more even defrosting. Shield any warm areas with small pieces of foil.

A dull thumping noise may be heard during defrosting. This sound is normal when the oven is not operating at High power.

**Defrosting Tips**

- Foods frozen in paper or plastic can be defrosted in the package. Tightly closed packages should be slit, pierced or vented AFTER food has partially defrosted. Plastic storage containers should be at least partially uncovered.

- Family-size, prepackaged frozen dinners can be defrosted and microwaved. If the food is in a foil container, transfer it to a microwave-safe dish.

- Foods that spoil easily, such as milk, eggs, fish, stuffings, poultry and pork, should not be allowed to sit out for more than one hour after defrosting. Room temperature promotes the growth of harmful bacteria.

- For more even defrosting of larger foods, such as beef, lamb and veal roasts, use Auto Defrost.

- Be sure large meats are completely defrosted before cooking.

- When defrosted, food should be cool but softened in all areas. If still slightly icy, return to the microwave very briefly, or let it stand a few minutes.

---

1. Press DEFROST AUTO/TIME twice.
2. Enter defrosting time.
3. Press START.
4. Turn food over when the oven signals TURN.
5. Press START.

(Auto Defrost explained in the section on Convenience Features.)

</table>
**Operating Instructions**

**Time Features**

**Express Cook**

This is a quick way to set cooking time for 1–6 minutes. Press one of the Express Cook pads (from 1 to 6) for 1 to 6 minutes of cooking at Power Level 10. For example, press the 2 pad for 2 minutes of cooking time.

The power level can be changed as time is counting down. Press POWER LEVEL and enter 1–10.

**Add 30 Seconds**

You can use this feature two ways:

- It will add 30 seconds to the time counting down each time the pad is pressed.
- It can be used as a quick way to set 30 seconds of cooking time.
Cooking with the probe allows you to heat to a certain internal temperature. This is the best way to cook many foods.

**Three Ways to Use the Temp Cook/Roast Feature**

1. **You set the temperature you want.**
   Press TEMP COOK/ROAST once. This is good for foods such as soups, casseroles, sandwiches and beverages.

2. **Temperature is automatically selected for cooking roasts medium or well.**
   Roast Medium—Press TEMP COOK/ROAST twice.
   Roast Well—Press TEMP COOK/ROAST three times.
   See the Roasting Guide for suggestions.

3. **Temperature is automatically selected for slow cooking of foods (simmer).**
   Simmer—Press TEMP COOK/ROAST 4 times. See the Simmer Guide for specific directions.

---

**The Temperature Probe**

**NOTE:** The turntable will not turn when the probe is in use.

The temperature probe is a food thermometer that gauges the internal temperature of food. The probe must be used when using Temp Cook or Roast.

The probe is not recommended for batters, doughs, frozen foods and foods which are difficult to cook precisely by temperature. Use the Micro Cook setting for these foods.

- Make sure the cable end is inserted all the way into the oven wall outlet.
- Insert the probe into the center of the food. Make sure the handle does not touch the food or the top or sides of the oven.
- Do not leave the probe in the oven if it’s not inserted in food. If it touches the oven wall, it may damage the oven.
How to Use the Probe and Set the Temperature Yourself

1 Insert the temperature probe in the center of a casserole and attach it securely into the oven wall outlet.

2 Press TEMP COOK/ROAST once.

3 Enter the desired food temperature.

4 Change power level if you don’t want full power. (Press POWER LEVEL. Select a power level 1–10.)

5 Press START.

6 When the temperature is reached, the microwave will signal. Food will be held at this temperature for 60 minutes. The oven beeps when the hold time is complete.

Cooking Tips

• Do not twist, drop or bend the probe.

• Use a lower power level with the probe; foods will take longer to cook but they will heat more evenly.

• Be sure frozen food has been completely defrosted before inserting the probe. The probe may break off if used in frozen foods.

• Cover foods loosely for moisture control and quick, even heating.

• Just as in regular roasting, only tender roasts should be roasted by using the probe. Less tender roasts should be microwaved by time.
How to Use the Probe with the Roast Settings

For the two Roast settings, the probe temperature is preprogrammed. The microwave signals when the temperature is reached.

Food will be held at this temperature for 60 minutes. The oven beeps when hold time is complete.

Preparing Meats for Roasting

- Place a tender beef roast in a cooking bag on a trivet in a microwave-safe dish. (Refer to package instructions for proper use of the cooking bag.)
- When using the probe in chicken, turkey or other poultry, insert the probe horizontally into the meatiest area.

Outlet

Beef (5 lb. max.)

</tbody>
</table>

1 Insert the probe in the roast and attach it securely into the oven wall outlet.

2 For medium doneness, press TEMP COOK/ROAST twice.

For a well-done roast, press TEMP COOK/ROAST three times.

3 Press START.

4 The microwave signals when it’s time to turn the roast over. After you turn the roast, close the door and press START.

NOTE: The oven continues to cook after the signal whether or not roast is turned over.
How to Use the Probe to Simmer

The Simmer feature heats food to 180°F. and holds it at that temperature up to 12 hours or until you remove it and press CLEAR/OFF.

1. Insert the temperature probe into the food, resting it on the side of the dish. Attach it securely into the oven wall outlet.

2. Press TEMP COOK/ROAST 4 times to select Simmer.

3. Press START. If you need to stir the food, restart the oven by pressing START again.

When the simmer temperature is reached, the oven holds the food at that temperature until CLEAR/OFF is pressed.

*Total time includes time to bring food to 180°F. and hold at that temperature until done.
Convenience Features

Popcorn

NOTE: Do NOT use the metal shelf with the Popcorn program.

Use only with prepackaged microwave popcorn weighing 1.75 to 3.5 ounces.
Follow package instructions.

How to Adjust the Popcorn Program to Provide a Shorter or Longer Cook Time
If you find that the brand of popcorn you use underpops or overcooks consistently, you can add or subtract 20–30 seconds to the automatic popping time.

To add time:
After pressing POPCORN, press 9 immediately after the oven starts for an extra 20 seconds.
Press 9 again to add another 10 seconds (total 30 seconds additional time).

To subtract time:
After pressing POPCORN, press 1 immediately after the oven starts for 20 seconds less cooking time.
Press 1 again to reduce cooking time another 10 seconds (total 30 seconds less time).

1 Place the package of popcorn in the center of the turntable or glass cooking tray.
2 Press POPCORN. The oven starts immediately. Tap POPCORN to select the bag size you are cooking.
The Reheat feature reheats 1 to 3 servings of many previously cooked foods.

1. Press REHEAT.
2. Select food type 1–6 for one serving (see Reheat Guide below).
3. Press 2 or 3 to reheat 2 or 3 servings.
4. Press START.

**NOTE:** The serving size may be changed or added after pressing START. Press number pad 2 or 3.

---

The Beverage feature heats 1 to 3 servings of any beverage.
Press BEVERAGE. The oven starts immediately.
The serving size is automatically set at 1, but can be changed by pressing 2 or 3 right after pressing BEVERAGE.

**Beverages heated with the Beverage feature may be very hot. Remove the container with care.**
The Snacks feature automatically sets the microwaving times and power levels to warm a variety of snack foods.

1 Press SNACKS.
2 Select snack type 1–6 (see the Snacks Guide below).
3 Enter the number of items or the food weight in ounces.
4 Press START.

Hint: You can press and hold the SNACKS pad during cooking to display the snack type and remaining microwaving time.

The Defrost Auto/Time feature gives you two ways to defrost frozen foods. Press DEFROST AUTO/TIME once for Auto Defrost or twice for Time Defrost.

Use Auto Defrost for meat, poultry and fish. Use Time Defrost for most other frozen foods.

Auto Defrost automatically sets the defrosting times and power levels to give even defrosting results for meats, poultry and fish weighing up to six pounds.

There is a handy guide located on the inside front of the oven.

You will need to know the food weight before setting Auto Defrost.

If the weight of food is stated in pounds and ounces, the ounces must be converted to tenths (.1) of a pound.

• Remove meat from package and place on microwave-safe dish.
• Twice during defrost, the oven signals TURN. At each TURN signal, turn food over. Remove defrosted meat or shield warm areas with small pieces of foil.
• After defrosting, most meats need to stand 5 minutes to complete defrosting. Large roasts should stand for about 30 minutes.
Operating Instructions

Other Features Your Model May Have

Help

The HELP pad displays feature information and helpful hints. Press HELP, then select a feature pad.

Cooking Complete Reminder

To remind you that you have food in the oven, the oven will display “FOOD IS READY” and beep once a minute until you either open the oven door or press CLEAR/OFF.

Clock

Press to enter the time of day or to check the time of day while microwaving.

1 Press CLOCK.
2 Enter time of day.
3 Select AM/PM.
4 Press START or CLOCK.

Scroll Speed

The scroll speed of the display can be changed. Press and hold the AM/PM pad about 3 seconds to bring up the display. Select 1–5 for slow to fast scroll speed.
The Reminder feature can be used like an alarm clock and can be used at any time, even when the oven is operating. The reminder time can be set up to 24 hours later.

1. Press REMINDER.
2. Enter the time you want the oven to remind you. (Be sure the microwave clock shows the correct time of day.)

3. Select AM or PM.
4. Press REMINDER. To turn off the reminder signal, press REMINDER again. The Reminder time may be displayed by pressing REMINDER.

**NOTE:** The REM indicator will remain lit to show that the REMINDER is set.

Display On/Off

To turn the clock display off, press and hold 0 for about 3 seconds.

To redisplay clock, repeat the above.

Delay Start

Delay Start allows you to set the microwave to delay cooking up to 24 hours.

1. Press DELAY START.
2. Enter the time you want the oven to start. (Be sure the microwave clock shows the correct time of day.)

3. Select Defrost Auto/Time, Micro Cook I & II or Temp Cook.
4. Press START.

The Delay Start time will be displayed plus “DS.” The oven will automatically start at the delayed time.

The time of day may be displayed by pressing CLOCK.

Timer On/Off

The Timer On/Off operates as a minute timer and can be used at any time, even when the oven is operating.

1. Press TIMER ON/OFF.
2. Enter time you want to count down.

3. Press TIMER ON/OFF to start.

When time is up, the oven will signal. To turn off the Timer signal, press TIMER ON/OFF.

**NOTE:** The TIMER indicator will be lit while TIMER ON/OFF is operating.
Operating Instructions

Other Features Your Model May Have

Start/Pause

In addition to starting many functions, START/PAUSE allows you to stop cooking without opening the door or clearing the display.

Child Lock-Out

You may lock the control panel to prevent the microwave from being accidentally started or used by children. To lock or unlock the controls, press and hold CLEAR/OFF for about three seconds. When the control panel is locked, an “L” will be displayed to the extreme right.

Turntable

For best cooking results, leave the turntable on. It can be turned off for large dishes. Press TURNTABLE to turn the turntable on or off. Sometimes the turntable can become too hot to touch. Be careful touching the turntable during and after cooking.

Vent Fan

The Vent Fan removes steam and other vapors from surface cooking. Press VENT FAN once for High fan speed, twice for Low fan speed or a third time to turn the fan off.

Automatic Fan

An automatic fan feature protects the microwave from too much heat rising from the cooktop below it. It automatically turns on at low speed if it senses too much heat. If you have turned the fan on you may find that you cannot turn it off. The fan will automatically turn off when the internal parts are cool. It may stay on for 30 minutes or more after the cooktop and microwave controls are turned off.
Surface Light

Press to turn the surface light on or off.

On some models, there is a night light option. Press SURFACE LIGHT once for bright light, twice for the night light or three times to turn the light off.

Sound Level

The beeper sound level can be adjusted up, down or off. Press SOUND LEVEL. Choose 0–3 for mute to loud.

Glass Cooking Tray

Models without a turntable have a glass cooking tray.

Sometimes the tray can become too hot to touch. Be careful touching it during and after cooking.

Auto Nite Light

You can set the night light to turn on and off automatically at any time you want.

1 Press AUTO NITE LIGHT.
2 Enter the time you want the light to turn on. Select AM or PM.
3 Press AUTO NITE LIGHT again and enter the time you want the light to turn off. Select AM or PM.
4 Press AUTO NITE LIGHT. NITE will stay lit to remind you that the feature is set. You can review the auto nite light settings by pressing AUTO NITE LIGHT. To erase your settings and turn off the automatic feature, press AUTO NITE LIGHT, then 0. The NITE indicator will no longer be lit.
Food microwaves best when placed on the turntable or on the shelf in the lower position.

For best cooking results, remove the shelf unless you are cooking on two levels.

- Make sure the shelf is positioned properly inside the microwave to prevent damage to the oven from arcing.
- Do not use a microwave browning dish on the shelf. The shelf could overheat.
- Do not cook with the shelf on the microwave floor. This could damage the microwave.
- Use pot holders when handling the shelf—it may be hot.
- Do not use the shelf when cooking popcorn.
Ideas for Using the Shelf

The lower position provides a flat surface for placing dishes that may tilt if placed on the turntable. The upper position gives you the option to reheat or cook more than one dish of food at the same time.

The lower position also allows you to place 2 dishes side-by-side. This is helpful for casseroles or other cookware that may be too tall to cook on 2 levels.

Cooking and Reheating

- To cook on 2 levels
  - or
  - To cook 2 dishes on the lower level:
    1. Double the cooking time.
    2. Switch places after 1/2 the time and give dishes 1/2 turn. (Place dense foods, or those that require a longer cook time, on the shelf first.)

- To reheat on 2 levels
  - or
  - To reheat 2 dishes on the lower level:
    1. Multiply reheat time by 11/2.
    2. Switch places after 1/2 the time.
**Microwave Terms**

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arcing</td>
<td>Arcing is the microwave term for sparks in the oven. Arcing is caused by:</td>
</tr>
<tr>
<td></td>
<td>• the temperature probe staying in the oven but not inserted in the food.</td>
</tr>
<tr>
<td></td>
<td>• the metal shelf being installed incorrectly and touching the microwave walls.</td>
</tr>
<tr>
<td></td>
<td>• metal or foil touching the side of the oven.</td>
</tr>
<tr>
<td></td>
<td>• foil that is not molded to food (upturned edges act like antennas).</td>
</tr>
<tr>
<td></td>
<td>• metal such as twist ties, poultry pins, gold-rimmed dishes.</td>
</tr>
<tr>
<td></td>
<td>• recycled paper towels containing small metal pieces.</td>
</tr>
<tr>
<td>Covering</td>
<td>Covers hold in moisture, allow for more even heating and reduce cooking time. Venting plastic wrap or covering with wax paper allows excess steam to escape.</td>
</tr>
<tr>
<td>Shielding</td>
<td>In a regular oven, you shield chicken breasts or baked foods to prevent over-browning. When microwaving, you use small strips of foil to shield thin parts, such as the tips of wings and legs on poultry, which would cook before larger parts.</td>
</tr>
<tr>
<td>Standing Time</td>
<td>When you cook with regular ovens, foods such as roasts or cakes are allowed to stand to finish cooking or to set. Standing time is especially important in microwave cooking. Note that a microwaved cake is not placed on a cooling rack.</td>
</tr>
<tr>
<td>Venting</td>
<td>After covering a dish with plastic wrap, you vent the plastic wrap by turning back one corner so excess steam can escape.</td>
</tr>
</tbody>
</table>
Care and Cleaning

**Helpful Hints**

Opening the oven door a few minutes after cooking helps air out the inside. An occasional thorough wiping with a solution of baking soda and water keeps the inside fresh.

**BE CERTAIN POWER IS OFF BEFORE CLEANING ANY PART OF THIS OVEN.**

**How to Clean the Inside**

**Walls, Floor, Inside Window, Metal and Plastic Parts on the Door.** Some spatters can be removed with a paper towel, others may require a damp cloth. Remove greasy spatters with a sudsy cloth, then rinse with a damp cloth. Do not use abrasive cleaners or sharp utensils on oven walls. **Never use a commercial oven cleaner on any part of your microwave.**

**Removable Turntable and Turntable Support (on some models).** To prevent breakage, do not place the turntable into water just after cooking. Wash it carefully in warm, sudsy water or in the dishwasher. The turntable and support can be broken if dropped. Remember, do not operate the oven without the turntable and support in place.

**Temperature Probe (on some models).** Clean immediately after using. To clean, wipe with sudsy cloth, then rub lightly with plastic scouring ball if necessary. Rinse and dry. The probe can also be washed in the dishwasher.

**Shelf (on some models).** Clean with mild soap and water or in the dishwasher. **Do not clean in a self-cleaning oven.**

**Glass Cooking Tray (on some models).** Wash carefully in warm, sudsy water or in the dishwasher. To prevent breakage, do not place the tray in water just after cooking. The tray can be broken if dropped. Remember, do not operate the oven without the cooking tray in place.
**Helpful Information**

**Care and Cleaning**

**How to Clean the Outside**

**Case.** Clean the outside of the microwave with a sudsy cloth. Rinse and then dry. Wipe the window clean with a damp cloth.

**Control Panel and Door.** Wipe with a damp cloth. Dry thoroughly. Do not use cleaning sprays, large amounts of soap and water, abrasives or sharp objects on the panel—they can damage it. Some paper towels can also scratch the control panel.

**Door Surface.** It’s important to keep the area clean where the door seals against the microwave. Use only mild, non-abrasive detergents applied with a clean sponge or soft cloth. Rinse well.

**Bottom.** Clean off the grease and dust on the bottom often. Use a solution of warm water and detergent.
**Light Bulb Replacement**

**Cooktop Light/Night Light**

To replace the bulb(s), first disconnect the power at the main fuse or circuit breaker panel or pull the plug.

Remove the screw at the front of the light cover and lower the cover.

Be sure the bulb(s) to be replaced are cool before removing. After breaking the adhesive seal, remove the bulb by gently turning.

Replace with 40-watt tubular bulbs. Order WB36X936 from your GE supplier. Tubular 40-watt bulbs (40T6½/2), available in supermarkets and hardware stores, may also be used for replacements.

Replace the screw. Connect electrical power to the oven.

**Oven Light**

To replace the oven light, first disconnect the power at the main fuse or circuit breaker panel or pull the plug.

Remove the top grille by taking out the 2 screws that hold it in place.

Replace the burned-out bulb with a 30-watt incandescent bulb (WB02X4235), available from your GE supplier.

Next, remove the two screws located above the door near the center of the oven that secure the light housing.
Helpful Information

The Exhaust Feature

The Vent Fan

The vent fan has 2 metal reusable grease filters. Models that recirculate air back into the room also use a charcoal filter.

Reusable Grease Filters

The metal filters trap grease released by foods on the cooktop. They also prevent flames from foods on the cooktop from damaging the inside of the microwave. For this reason, the filters must ALWAYS be in place when the hood is used. The grease filters should be cleaned once a month, or as needed.

To Remove Grease Filter

To remove, slide it to the rear using the tab. Pull it down and out.
To clean the grease filter, soak it and then swish it around in hot water and detergent. Don’t use ammonia or ammonia products because they will darken the metal. Light brushing can be used to remove embedded dirt. Rinse, shake and let it dry before replacing.

To replace, slide the filter in the frame slot on the back of the opening. Pull up and to the front to lock into place.

Charcoal filters cannot be cleaned. They must be replaced.

If the model is not vented to the outside, the air will be recirculated through a disposable charcoal filter that helps remove smoke and odors. The charcoal filter should be replaced when it is noticeably dirty or discolored (usually after 6 to 12 months, depending on hood usage). Order Part No. WB02X9883 from your GE supplier.

To remove the charcoal filter, disconnect power at the main fuse or circuit breaker panel or pull the plug. Remove the top grille by removing the 2 screws that hold it in place. Slide the filter towards the front of the oven and remove it.

To install a new filter, remove plastic and other outer wrapping from the new filter. Insert the filter into the top opening of the oven as shown. It will rest at an angle on 2 side support tabs and in front of the right rear tab. Replace the grille and 2 screws.

**All These Things Are Normal With Your Microwave Oven**

- Steam or vapor escaping from around the door.
- Light reflection around door or outer case.
- Dimming oven light and change in blower sound may occur while operating at power levels other than high.
- Dull thumping sound while oven is operating.
- Some TV-radio interference might be noticed while using your microwave oven. It’s similar to the interference caused by other small appliances and does not indicate a problem with your microwave. If you notice this interference, check that the microwave oven is on a different electrical circuit, relocate the radio or TV as far away from the microwave as possible, or check the position and signal of the receiving antenna.

GE Service Numbers

We’ll be there!

GE Answer Center®

800.626.2000

Whatever your question about any GE major appliance, GE Answer Center® information service is available to help. Your call—and your question—will be answered promptly and courteously.

And you can call any time. GE Answer Center® service is open 24 hours a day, 7 days a week.

In-Home Repair Service

800-GE-CARES (800-432-2737)

A GE consumer service professional will provide expert repair service, scheduled at a time that’s convenient for you. Many GE Consumer Service company-operated locations offer you service today or tomorrow, or at your convenience (7:00 a.m. to 7:00 p.m. weekdays, 9:00 a.m. to 2:00 p.m. Saturdays).

Our factory-trained technicians know your appliance inside and out—so most repairs can be handled in just one visit.

For Customers With Special Needs

800.626.2000

Upon request, GE will provide Braille controls for a variety of GE appliances, and a brochure to assist in planning a barrier-free kitchen for persons with limited mobility. To obtain these items, free of charge, call 800.626.2000.

Consumers with impaired hearing or speech who have access to a TDD or a conventional teletype-writer may call 800-TDD-GEAC (800-833-4322) to request information or service.
We’re proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are three steps to follow for further help.

First, contact the people who serviced your appliance. Explain why you are not pleased. In most cases, this will solve the problem.

Next, if you are still not pleased, write all the details—including your phone number—to:

Manager, Customer Relations
GE Appliances, Appliance Park
Louisville, KY 40225

Finally, if your problem is still not resolved, write:

Major Appliance Consumer Action Program
20 North Wacker Drive
Chicago, IL 60606

Service Contracts

800-626-2224

You can have the secure feeling that GE Consumer Service will still be there after your warranty expires.

Purchase a GE contract while your warranty is still in effect and you’ll receive a substantial discount. With a multiple-year contract, you’re assured of future service at today’s prices.

Parts and Accessories

800-626-2002

Individuals qualified to service their own appliances can have parts or accessories sent directly to their home. The GE parts system provides access to over 47,000 parts...and all GE Genuine Renewal Parts are fully warranted. VISA, MasterCard and Discover cards are accepted.

Care and cleaning instructions contained in this manual cover procedures to be performed by any user. Other servicing generally should be referred to qualified service personnel. Caution must be exercised, since improper servicing may cause unsafe operation.

Further Service

You can have the secure feeling that GE Consumer Service will still be there after your warranty expires.

Purchase a GE contract while your warranty is still in effect and you’ll receive a substantial discount. With a multiple-year contract, you’re assured of future service at today’s prices.

Care and cleaning instructions contained in this manual cover procedures to be performed by any user. Other servicing generally should be referred to qualified service personnel. Caution must be exercised, since improper servicing may cause unsafe operation.
FULL ONE-YEAR WARRANTY

For one year from date of original purchase, we will provide, free of charge, parts and service labor in your home to repair or replace any part of the microwave oven that fails because of a manufacturing defect.

LIMITED ADDITIONAL NINEYEAR WARRANTY

For the second through the tenth year from the date of original purchase, we will provide, free of charge, a replacement magnetron tube if the magnetron tube fails because of a manufacturing defect. You pay for the service trip to your home and service labor charges.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are in your state, consult your local or state consumer affairs office or your state’s Attorney General.

WARRANTOR IS NOT RESPONSIBLE FOR CONSEQUENTIAL DAMAGES.

Staple sales slip or cancelled check here. Proof of original purchase date is needed to obtain service under warranty.
