Specification Revised 1/18

UCC15NJII

15" Built-In Gourmet Clear Ice Maker

INSTALLATION INFORMATION

The ice machine can be used free-standing or as a built-in, under the countertop.

The ice machine requires a 115 Volt, 60 Hz., AC only power supply, with an individual, properly grounded branch circuit, protected by a 15 amp fuse or circuit breaker.

To achieve a custom appearance, the ice machine door accepts 3/4" custom panels to coordinate or contrast with cabinetry. Optional stainless steel door panels are available: order PIP70SS door panel kit with GE Profile™ handle, CIP75SS door panel kit with GE Café handle or ZIP80SS door panel kit with Monogram Euro handle.

NOTE:

The ice machine is equipped with a gravity drain to prevent water from flowing back into the ice storage bin. A drain pump is necessary when a floor drain is not available. Order UPK3 Drain Pump Kit.

For answers to your Monogram, GE Café™ Series, GE Profile™ Series or GE Appliances product questions, visit our website at geappliances.com or call GE Answer Center® Service, 800.626.2000.
