**Uses Most
Energy
573**

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size dishwashers are used in this scale.

**Dishwasher using more energy cost more to operate.
This model's estimated yearly operating cost is:**

\$27

When used with an electric water heater

\$15

when used with a natural gas water heater

Based on five washloads a week and a 2000 U.S. government national average cost of 8.28¢ per kWh for electricity and 65.6¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase in a violation of federal law (42 U.S.C. 6302).
