| Fan Speed Stages                             | 5+ Auto                |

- ODU Compatibility - Compatible with 1H18HN2DAA Outdoor Unit.
- Efficient Operation - High-power turbo mode and warm start technology help heat and cool rooms more quickly, and an auto louver adjusts airflow upward when cooling and downward when heating.
- Wi-Fi Connectivity - Hotpoint® systems connect seamlessly to the SmarthQ™ App from GE Appliances, giving homeowners more control over their comfort.
- Easy to Install, Easy to Service - A mounting template and mounting plate with dimensions make installation a breeze, while an extended kickstand and easy-access control board let you service systems without removing casings. Plus, a two-way piping drain on the right and left sides makes installation easier and ensures units fit in more applications.
- Federal & State Incentives - Eligibility for federal and state incentives makes Hotpoint the easy choice for price-conscious consumers. All Hotpoint heat pumps are certified CEE Tier-2 except for 24K units installed in the South region. See CEE directory for qualifying models.
- Worry-Free Warranty - Unlock a 5-year limited parts and compressor warranty with registration; see warranty documentation for complete information.
- See specification guide for full heating, cooling, and system details. -
